

## 10K CREA

- The machine is equipped with sophisticated software that manages its functions
- In addition to the normal manual function it includes the 4 specific production programs
- The automatic programs leave the operator free to focus on other tasks
- An electronic inverter system for the control and regulation of the motor enables to vary the number of rpms of the blade (from 60 to 130 rpm) to achieve the desired results
- Equipped with wheels and brake, easily moved as needed
- Easy cleaning through the drain valves
- Blade is stainless steel AISI 304 with adjustable scrapers

### Technical Specifications

Electrical Supply: 230V/50Hz/1~

Net Weight: 67kg

Loading: 1100W

Output: 10kg/14L

Dimensions- w x d x h (mm): 450 x 595 x 1050

Bowl Volume: 6L

Max Ingredient Volume: 3L

Max Ingredient Capacity: 2.2kg

Time Per Batch: 10-12mins
