

HLP New Product Information Sheet.

Model: B10

This is a truly versatile Wireless Temperature Food Safety Monitoring Data Logger which automatically logs data to the Cloud.

Implement full paperless, automatic recording with minimal set up and maintenance.

Email alarms and a report can be emailed each week / month including graphs and any alarms.

Colour display screen shows temperature and alarms.

Battery powered or mains powered.

Minimal monthly cost for cloud monitoring.

■ Features include:

- Wireless - use anywhere you have WiFi access,
- Place the probe into the fridge, place the unit in a convenient spot and it will automatically log the temperatures to the Cloud,
- Press button activation of the display,
- INBUILT GLYCOL BOTTLE - place the probe into the glycol bottle & place it in the fridge to dampen the temperature fluctuations (eg due to fridge opening etc).

**Paperless
System!**
