

Oxygen Concentrator – Oxygenate 5

Stationary oxygen designed
for the patient experience

PHILIPS

Stationary oxygen concentrators allow patients to manage their oxygen needs at home, helping patients to feel a sense of control over their own care and offering greater freedom to enjoy their daily activities. However, these offerings can be loud and make it difficult to hear conversations or the TV. These devices may also require scheduling an appointment with a service technician to manage routine maintenance.

Oxygenate 5 delivers an enhanced experience for patients in need of supplemental oxygen.

Delivering quality supplemental oxygen, this offering distributed by Philips:

- Delivers a quiet experience with a sound level of <40dBA, which is similar to the hum of a refrigerator^{1, 2}
- Encourages patients to feel more engaged in their therapy with features like an easy-to-read digital display
- Supports clinicians and home care providers in their ability to manage patients
- Helps with ease of maintenance with patient-replaceable filters

Oxygenate 5 product features:

-  Nine levels of filtration
-  Digital flowmeter designed to make reading and setting up parameters easier
-  Built-in oxygen reservoir

PHILIPS

Added value and support:

-  Ships with twelve additional primary air inlet filters and three additional secondary air filters, which are user-replaceable and may help lower consumable purchases and operational cost
-  Comes with a 10,000 hours sieve warranty and a 3-year limited warranty

Oxygenate 5 delivers quality
care with the patient in mind –

that's what matters most.
