## Introducing the new ActiveCore TMF freezers

Front-of-house display freezers are not normally known for their refinement, but the TMF range is cut from a different cloth. As part of the ActiveCore family, the new TMFs follow the same design philosophy of the BME and TME fridges that redefined quality in chilled drinks display.

However, the TMFs aren't just the freezer equivalents of ActiveCore fridges.

We've engineered them to defy expectations as well as deliver everything you've come to expect from ActiveCore.

Annual Running Cost Comparison\*

## Cutting edge power efficiency

Expertly designed natural refrigerant technology ensures minimised carbon footprint and energy efficiency gains of 25% over the superceded VFX freezer range.

But there is no compromise on performance, with TMF comfortably holding frozen food at 40°C ambient temperature.

## Quiet running

ActiveCore is a name synonymous with quiet front-of-house experiences, and the TMF range is no different – despite the fact they provide heavy duty freezing capabilities.

Quietest display freezer

SKOPE-connect™

## Unprecedented control

Hush the fan, schedule the lights, choose the optimum temperature for your product. Do it all at the touch of your smartphone with SKOPE-connect™.

Specialty freezing temperature pre-sets:

- Food Safe (-21°C to -18°C)
- Seafood (-23°C to -20°C)
- Frozen Dessert (-21°C to -18°C)
- Premium Ice Cream (-26°C to -23°C)
- Ice Cream – Serving (-15°C to -12°C)
- Gelato – Serving (-12°C to -9°C)
- Ice (-12°C to -9°C)
- Manual (-21°C to -18°C)

## Heavy duty technology – as standard

Utilising inverter technology to maximise efficiency, active condensation control for clear glass display, and the strength and power inherent with everything ActiveCore.

The TMF range is heavy duty from start to finish and at no extra cost.

ActiveCore™ Technology

Quicker, safer servicing

## Quicker, safer servicing

ActiveCore sets the standard in interchangeable modular cartridge technology, so you can be sure that TMF is a safe bet for minimised downtime, quicker on-site maintenance, and safe off-site motor repair.

\*Tested @30c kWh; based on GEMS data 01/12/2021.
