F102 Infrared Thermometer, with CE Certificate

Product Specifications:

Features:

1. With German high-precision infrared sensors, performance stable and reliable.
2. Stronger environmental temperature and adaptability, in a complex environment can still normal use.
3. A new independent intellectual property rights structure detection head, ensure a more precise measurement.
4. Two kinds of low temperature and object temperature measurement mode, the mode switch is a key operation, convenient and practical
5. Low temperature alarm prompt, fever can be set emergency alarm.
6 .Low automatically save the last measured values.
7. Two low degrees Celsius and Fahrenheit temperature unit can be chosen.
8. Automatic shutdown save electricity and energy saving.
9. Thermo tech digital thermometer

Specification:

Measurement mode: Non-contact

Measuring distance: 1cm to 5cm

Measurement /animal heat: 35°c to 42°c (85°F to 107.6°F)

Measurement/material temperature: 0°c to 100°c (32°F to 212°F)

Measurement accuracy / animal heat: ±0.2°c / 0.4°F

Measurement accuracy / material temperature: ±1°c / 1°F

Display resolution: 0.1°c / 0.1 °F

Operation environment: 10°c to 40 °c (50°F to 104°F)≤80% moisture condensation

Storage environment: -20°c to 60 °c (-4°F to 140°F) ≤90% moisture condensation

Electrical source   AA (1.5V) alkaline battery * 2pcs
