

Infection Control Solutions &
Specialised Hospital Equipment

WDS

**Combination
Bedpan and Utensil
Washer Disinfector**

Malmet (Australia) Pty Ltd is a leading manufacturer of Infection Control Solutions and Specialised Hospital and Aged Care Equipment for CSSD, Recovery, Obstetrics, Theatre and Ward Utility Rooms.

Malmet is a company belonging to the Celi Group of Companies, a privately owned and operated family business.

Malmet has been manufacturing hospital and aged care equipment since 1969, and supplies hospitals and nursing homes throughout Australia and overseas via a comprehensive network of distributors and agents.

All Malmet products are manufactured at the AS/NZS ISO 9001 certified Malmet Leeton, NSW site.

WDS

Combination Bedpan and Utensil Washer Disinfector

The only Combination Washer Bedpan and Utensil Disinfector designed to meet Australian requirements.

The WDS has been designed to provide combined capabilities of a bedpan/urine bottle washer, and a utensil/bowl washer, without the additional cost and space necessitated by having separate machines. This allows more space and budget to be allocated to more income producing activities, such as additional beds, operating theatres etc.

Designed and manufactured in Australia to meet our client's needs.

The WDS has gone through a thorough and exhaustive R&D program, including site trials at a number of facilities. Malmet has listened to the needs of both clinical and engineering staff and has designed the WDS to meet the requirements of all our clients, whether it be a large metropolitan hospital, a smaller regional hospital, or an aged care facility.

Designed to minimise Infection Control Risk.

The WDS has been designed to mitigate infection control risk.

This has been achieved by...

- A control panel that has simple, identifiable symbols (not numbers) – making it easy to select the correct program
- All cycle programs disinfect to the higher Ao600 level as recommended under AS4187:2014, there are no short "flush only" programs.
- The WDS has unique sensors that detect the correct rack is in place for the required activity, whether it be washing bedpans/urine bottles, or utensils/bowls
- Once a program is selected, cycle can be commenced using hygienic hands-free infrared sensor
- All wash water is automatically dumped between each program to further minimise risk of cross contamination

Designed to comply with Australian and ISO Standards, and TGA.

As an Australian manufacturer, it is far more onerous for us to comply with the relevant Australian and International Standards. In Australia we have had to go through a rigorous process, including local inspections of our factory, to ensure we meet all of the Standards. This means that you can be reassured that the WDS fully meets not just ISO15883, but also AS4187:2014. ARTG Certification 232450

Door Obstruction Feature.

The door obstruction feature is factory set; causing the door to re-open when an obstruction is detected. This is designed to protect the integrity of the unit and the articles within.

WDS

Features

WDS

Easy to load

Bedpans and Urinal Bottles

WDS will hold up to 2 standard or bariatric bedpans, and up to 4 standard urinal bottles

WDS will hold up to 6 kidney dishes (with optional rack) or 2-4 bowls of various sizes. There is also an optional small items utensil basket with lid.

WDS

Easy to use

- 1 Open door: hold hand in front of sensor

- 2 Ensure racks are in correct position for items being washed

- 3 Load items

Urine / Bedpan cycle

- 4 Select cycle

Urine cycle

Bowl/Utensil cycle

- 5 Close door using
or
press

- 6 Cycle will start automatically

Note: For infection control safety, if the wrong program is pressed for the rack position selected, then "wrong rack" will be displayed, and the machine will not start.

WDS

Easy to service

SERVICE DIVISION

Robust technology, easy to service, local spare parts

One of the cornerstones underpinning Malmart is our commitment to excellence in customer service. At all levels of our company - from the production floor to our sales and management staff - integrity and professionalism mark the way we do business.

Malmart Service manage the service for the Malmart brand of hospital equipment. All Malmart Service Technicians are comprehensively factory trained offering a professional and competitive service.

Urgent service/breakdown requests are attended to within a 24 hour period.

Malmart prides itself on achieving outstanding customer service satisfaction, obtaining 9/10 and higher on all Customer Service Quality Audits.

Malmart have their own service technicians to cover most of NSW/ACT, with authorised service agents for other areas. Interstate, Malmart have fully trained authorised service agents to cover most of Australia.

Preventative Maintenance Agreements and Validation Testing and Certification

With the changes to the Healthcare Industry accreditation process more facilities are required to show that all equipment is maintained according to the manufacturers recommendations. Malmart recognises this need and are pleased to offer Preventative Maintenance Agreements (PMA) for all Malmart products, and Validation Testing and Certification in accordance with AS4187:2014 and ISO15883

PMA's take into consideration the quality, age and usage of the products to give the most suitable scheduled competitive agreement tailored to the facilities requirements. Malmart or its authorised service agents can offer a competitive, professional PMA tailored to your organisation.
