

## CHILLAPAK COOLING VEST

Reduces risk of heat stress and improves comfort in warm conditions. The Chillapak Vest is guaranteed to improve worker comfort in hot, humid or warm conditions.

The Chillapak is ideal for outdoor workers such as gardeners, postmen, labourers, carpenters, electricians, tilers, roof-insulators, road workers, couriers/drivers, etc.

Great for the outdoor sportsmen - ideal for fishing, golf, tennis, lawn bowls, bush-walking, cycling, mountaineering and watching outdoor sport events (and probably much more).

### Features and Applications of this Chillapak Cooling Vest

- Quicker recovery times after strenuous physical activity
- Improved worker safety in hot or warm environments
- Improved ability to cope with warm/hot weather
- Meets Flame Retardant standards for safety
- Most effective where temps are over 30C
- Equally effective in high humidity or dry heat
- Improved performance in hot conditions
- Strong, secure Zipper down the front
- Velcro strap to adjust for personal comfort
- Comes with 8 re-useable Chillapak coolant packs
- Velcro closure over pockets to keep packs in place
- Gel packs are non toxic and safe for food contact
- Australian Made
- Other colours available with short lead time

Chillapak vests have been shown to aid performance and increase concentration by reducing the effect of heat on the body. Chillapak vests accelerate the body's natural cooling capacity by placing four frozen gel packs into pockets close to the skin

around the upper torso. These packs help reduce the strain on the heart - it does not need to work so hard at trying to pump blood to the surface of the skin to cool down. This increased flow of blood to the heart, brain and muscles helps improve productivity and alertness.

Designed to reduce the risk of heat stress and heat fatigue and workplace accidents, Chillapak body cooling vests can be used in areas where there is no respite from hot conditions. Chillapak vests have two pockets on both the front chest and upper back areas. Four frozen gel packs are inserted into these pockets. With a zip front they are easy to slip on and off. Each vest comes with 8 gel packs so that while 4 are being used the other four can be kept in the freezer ready for when needed - this allows for continual use of the Chillapak vest. Unlike other methods of cooling, the vests work well in humid conditions and in confined spaces.

To use:

- Remove frozen packs from the freezer immediately before use
- Place packs in the pockets of the Chillapak vests
- Please pack into vest pockets with bubble pack side facing body
- Use Velcro strips to secure pockets
