80365 Mobile Parts Washer

The 80365 mobile parts washer from Alemlube is the ideal addition to any workshop looking to keep tools and mechanical parts & components clean and free of contaminants. The unit incorporates an on/off switch, large filter, cleaning brush assembly and its PE HD construction is resistant to water based solvents.

Easily moved from one workshop location to another, this well designed washing bay is self contained with a lid that can be latched closed at the end of the job.

The 80365 is mounted on a pedestal at an OH&S acceptable height and features sturdy lockable wheels, storage space, tools support rail, integrated emptying plug and simply plugs into a 240V power outlet for instant on demand operation resulting in increased working efficiencies and productivity.
