Performances on slopes

While the force expressed in N at the hook remains unchanged, the following circumstances **may affect the towing capacity expressed in kg**:

- **type of ground** on which the towing is performed;
- towing on **flat ground or on a slope**;
- use (or not) of **ballasts**;
- **type of wheels** mounted on the vehicle and on the trailer.

= Standard version

= With Upgrade

5 levels speed adjustment

On the new M10 tillerhead by Zallys is mounted **as standard** a button for the adjustment of the speed of the machine. By clicking it, at each click you switch to the next level. This allows a fast and easy selection of the correct speed based on the kind of manoeuvre. **The Flex-to-Go system** has been studied to give a better maneuverability in confined spaces and more speed on the longer journeys.

Each click adds **20% more speed**.

Speed ramp:

20% - 40% - 60% - 80% - 100%

Once the maximum speed is reached, by pressing the button again it returns to 20%.

5 SPEED CONTROL

Ergonomic driving

Zallys' tillerhead has been conceived and produced to make the use of the machine more ergonomic for the operator, guaranteeing the right **comfort while driving during the work shift**. Its **ergonomic design** allows to have **all the driving controls at your fingertips**, the display with the battery charge level and the power key for an easy and fast ignition. The **structure** is made of **resistant materials** in case of accidental bumps.

The right wheels for every need

M10 comes as standard with **pneumatic wheels**, suitable both for indoor and outdoor use, always guaranteeing the maximum grip and a really low level of vibrations. Moreover, they are very resistant and offer exceptional performances on every kind of ground. By purchasing the Upgrade, **M10** can be configured to tow up to **15.000 kg**; in this case, it will be equipped with **superelastic wheels** and reinforced axles to guarantee the resistance during the operation of such heavy loads.

Autonomy for a full workday

M10 is powered by four 250/335 Ah batteries, which guarantee the machine for **8 hours operation at continuous use**, and are easy to recharge thanks to the high frequency external battery charger.

Modular ballasts system

Zallys modular system guarantees **maximum flexibility** on increasing the vehicle's performances. With just **22 kg unit weight** (side ballasts) and **17 kg** (rear ballasts), single ballasts are lightweight and can be equipped **without physical effort by the operator**, while maintaining all their effectiveness.

STANDARD HITCH

STANDARD HITCH

Hydraulic lifting system (optional)

On request, it is possible to equip **M10** with a **hydraulic lifting hitch kit**, which allows to lift and tow 2-wheeled trailers easily and safely, directly with the controls on the tillerhead.

ACCESSORIES

ACCESSORIES

Side buttons (optional)

On request, it is possible to equip **M10** with a **kit of side buttons** to ease the connection operations. By pressing them, the operator can move the machine slightly forward or backwards, bringing it closer to the trailer to connect in a more precise way.
