FORNI

First quality materials are used to build the concrete part of our ovens.

Our products are made by highly heat reflected materials having rich alumina content, mixed, inserted into appropriate molds and immediately vibrated.

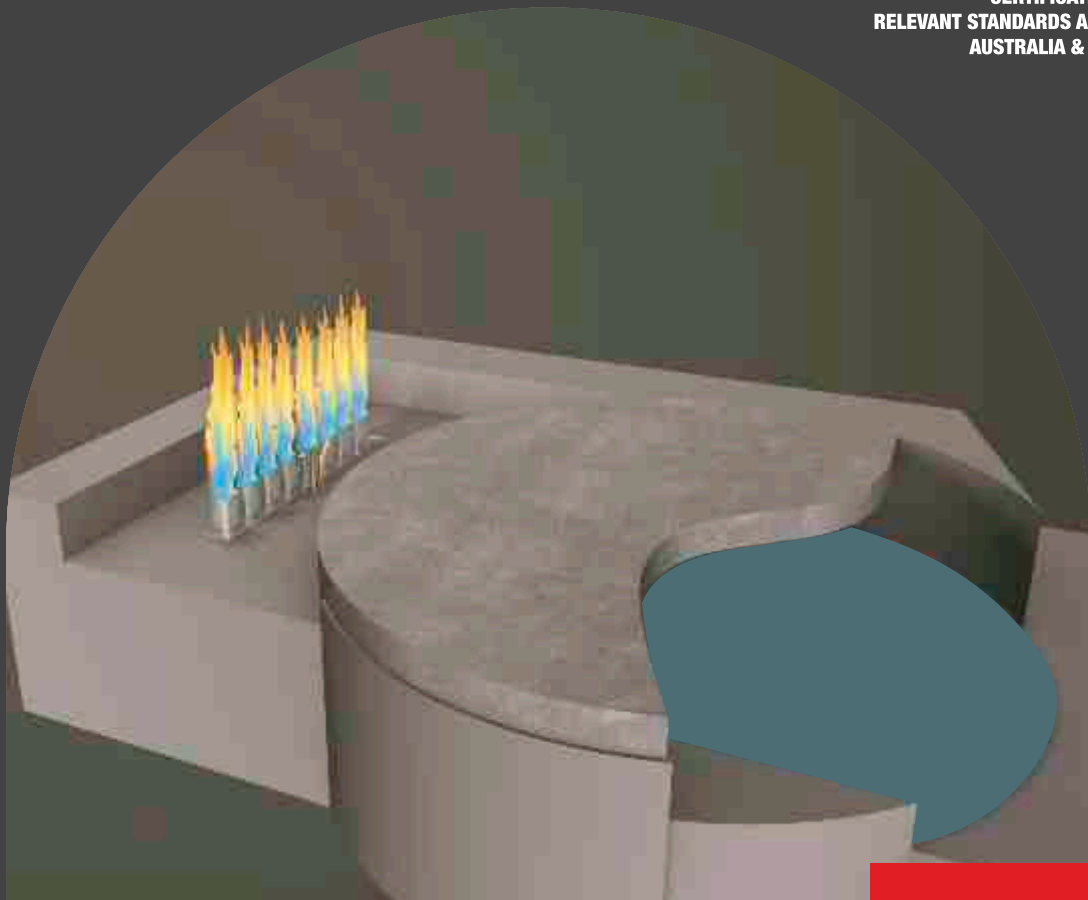

They're equip with computers allowing fast and easy management for the user.

PIZZA OVEN X FACTORY

Mini rotary oven gas/wood

LEFT OVEN

available in wood or gas models

It turns 60 pizzas per hour.

This is a very versatile oven for producers who want to save space, diversify their offer and increase production to cope with peak workloads.

The smallest oven the Kuma Forni has all the same characteristics as the bigger ones (before it was copied): access doors, wood compartment, adjacent burner and separated accesses to the dashboard. Thanks to its small size, it can be delivered already assembled.

Fast installation: you just need to connect it to the chimney.

The time needed to heat the pizza oven up to the required temperature is only 20 minutes.

TYPE	PIZZAS CAPACITY OF 31CM	ROTARY PLATE CM	DEPTH CM	WIDTH CM	CHIMNEY CM	WEIGHT KG
85 SX Legna	4	85	125	145	20	900
85 SX Gas	4	85	125	145	16	900
