

Pal-Tec Single Palletising Stations

OVERVIEW

Optimum's custom Pal-Tec Palletising Stations with integrated pallet lifters, conveyors, stairs and work areas can be designed to suit your specific needs.

Designed for single palletising requirements, Optimum's Palletising Stations are designed to meet the need of your process and site. The ergonomic designs increase productivity and safety of your workers, creating an efficient work environment.

Pal-Tec Palletising Stations are ideal for conveying, packaging, lifting, loading/unloading, and palletising/depalletising goods.

- ✓ Increase safety and line efficiency
- ✓ Engineered to provide easy access to, and operation of, hard-to-reach equipment or goods
- ✓ Designed to meet your specific requirements
- ✓ Australian designed and manufactured
- ✓ 12 months warranty

Pal-Tec Multi Palletising Stations

OVERVIEW

Optimum's custom Pal-Tec Multi Palletising Stations can be designed to suit your specific needs and processes. Just like the single palletising stations, these units can be constructed with your choice of integrated pallet lifters, conveyors, stairs, gates and work stations. Available in standard mild steel powdercoated construction or custom galvanised or stainless steel construction.

Custom designed multi palletising stations and work platforms are ideal for increasing safety and line efficiency.

- ✓ Adaptable custom design for your specific requirements
- ✓ Side safety rails for elevated worker safety
- ✓ Checker-plate, diamond thread plate, or fibreglass grating floor options
- ✓ Increased productivity for material handling
- ✓ Quality construction ensures low maintenance
- ✓ Protection at elevated opening for employees
- ✓ Quality Australian made unit
- ✓ 12 months warranty
- ✓ Increase safety and line efficiency
