# EFA-SST® Efficient: Space saving and secure

## Design

- Slimline frame, ideal for cramped installations
- Chain drive ensures minimal maintenance costs
- Robust design for medium frequency use
- Spiral door blade design for reduced wear and high speeds

## Safety

- Resistance class 2 (WK 2) in accordance with DIN V ENV 1627-1630:1999-04 after each closing process
- Listed in the police directory of manufacturers\*\*
- Photo-cell and contact edge

## Door blade

- Thermally separated EFA-THERM® laths (40 mm) supplied as standard
- Optional transparent EFA-Clear® lath

## Control

- EFA-TRONIC® in polycarbonate control box
- EFA-TRONIC® Professional in steel control box
- EFA-HDI operating unit (optional extra)

## Finish

- Galvanized steel parts (powder coated option)
- Door laths with painted surface, available in various RAL

## Operating speed / Cycles

- Opening speed up to 0.5 m/s
- Closing speed up to 0.5 m/s
- Up to 150,000 load cycles per year

## Manual release

- Manual opening utilizing hand crank

## General

- Robust, cost effective, and economical
- Max. W = 4,000 mm, H = 5,130 mm\*
- Wind class 2 – 4 (depending on door size)
- Tested and certified by ift Rosenheim

\* Max. dimensions combined not possible

\*\* Appointed in police directory for approved and certified burglary resistant products

# Compact and efficient to meet the highest requirements

## The tailored safety solution

Cramped or environments with limited space require a tailored solution which fits with the given conditions. With the new high-speed spiral door EFA-SST® Efficient, EFAFLEX offers a cost efficient, slimline, and springless door which can be universally installed, even in the tightest location.

## Compact, low maintenance and universally adaptable

Due to the heavy-duty chain drive, the EFA-SST® Efficient does not use a counterbalance, which enables maximum space saving and minimal maintenance or repair costs. Furthermore, the EFAFLEX high-speed spiral door can be incorporated into many situations due to its compact, slimline frame. The highly insulated door blade makes it ideal for both internal and external use.

## Innovative security without compromise

The EFA-SST® Efficient extends the EFAPROTECT® Series and is certified in accordance with DIN V ENV 1627-1630:1999-04 for resistance class WK 2. When closed, the automatic burglar-proof lock ensures effective protection from unwanted intruders. The EFA-SST® Efficient – an innovative all-rounder that ensures maximum security without impeding normal operations.
