

MORE PRECISION

VX25-100 VACUUM EXCAVATOR

Locating underground services? Excavating in close quarters? Searching for the safest way to excavate? Whether you're dealing with mud, water, dirt or most other non-hazardous substances, the versatility of this machine is limited only by your imagination. In addition to excavation, they can be used for slurry removal, industrial clean-up, manhole clean out, lift station clean out and much more.
