PROTECTIVE SHEETS, PADS & COVERS

TOUCHDRY® BREATHABLE ABSORBENT PAD RANGE

A new era in breathable bed pads

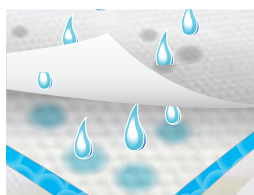

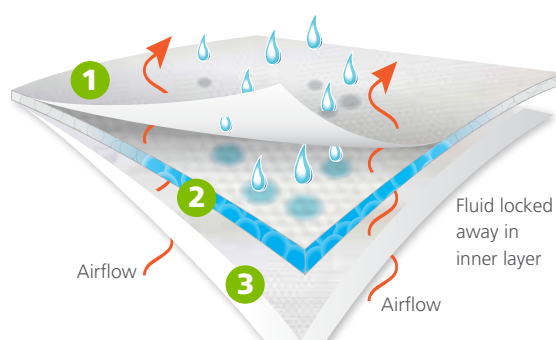

Haines®
MEDICAL AUSTRALIA

**99.87%
MOISTURE IS
LOCKED IN
AFTER
5 MINUTES**

TouchDRY® Breathable Absorbent Pads are white, soft, flat sheets with an absorbent layer and waterproof yet breathable underside. Designed to support climate control and preserve skin integrity, they lock away moisture to protect patients' skin, and prevent fluid from seeping through to equipment or furnishings.

THREE LAYERS OF PROTECTION

- 1** The **soft, non-woven air-permeable top layer** is gentle on healthy skin as well as skin of the very young to the very old plus vulnerable and fragile skin during periods of illness
- 2** The **super absorbent inner** draws body fluids away from the skin and locks them away to keep skin dry
- 3** The **breathable, waterproof backing** assists the containment of fluid for safe disposal

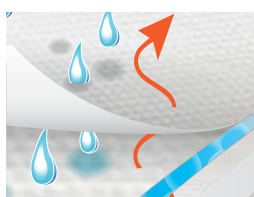

Moisture management

TouchDRY® dries faster than traditional bed pads, preserving the microclimate and patient comfort.

High level fluid handling capacity

TouchDRY absorbs 3.2 litres per m² (AWTA 62) assisting the containment and safe disposal of bodily fluids.

Breathable backing

20 times more breathable than Blueys and Pinkies.

Reduce costs

By protecting air assisted patient transfer mats, theatre tables and equipment.

Protective Sheets,
Pads & Covers

HOW DOES TOUCHDRY® BENEFIT PATIENTS?

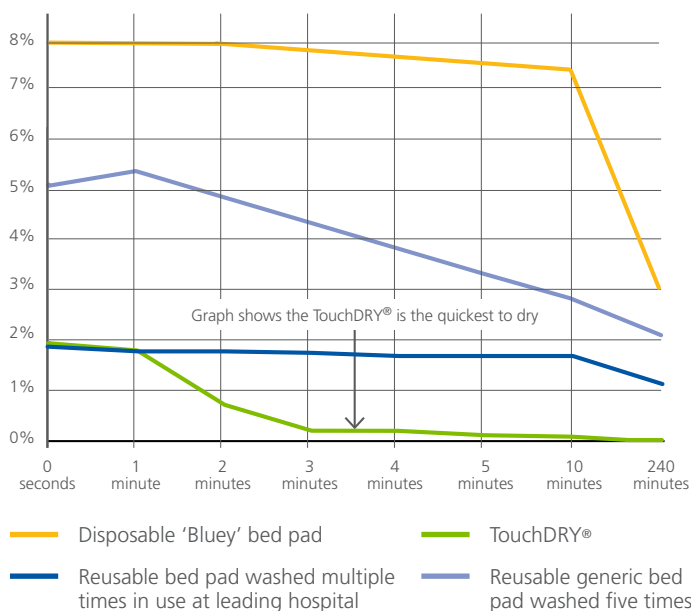

- **Breathability** - TouchDRY® is 20 times more breathable than Pinkies or Blueys and 13 times more breathable than Depend bed pads (AWTA product test - ASTM E96-2012).
- **Keeps patients dry** - TouchDRY® helps manage moisture and preserve the skin microclimate, reducing the risk of moisture-related skin damage - crucial for the preservation of skin integrity (refer to independent report and testing for more information)
- **Soft on skin** - Designed to be flat, soft and used in direct contact with skin. Ideal for absorbing leakage during wound care and surgical procedures, nursing patients with leg ulcers, lymphedema, pressure injuries and other open wounds
- **Odour reduction** - The highly absorbent polymers encapsulated in TouchDRY's core help to reduce unpleasant odours
- **No added pressure** - An independent pressure study proved that there was no additional pressure load on a patient's skin when using TouchDRY. Tests were conducted at 25kg, 50kg and 100kg. Contact us for a full copy of the report
- **Latex free**

HOW DOES IT BENEFIT FACILITIES & STAFF?

- **Economic impact** - by alleviating strikethrough, effectively reducing linen changes and protecting equipment
- **Better fluid handling capacity** - 3200ml / m² / 24h (AWTA 62) as compared to the average market leading standard poly backed protective sheets which are 708ml / m² / 24h (*"Review & Report on Haines TouchDRY Absorbent Pads – Moisture Management Focus"*, Sandy Dean, MWoundcare, RN FAWMA MACN)
- **Reduce costs** - typically less than the cost of machine washing
- **Always available for staff** - no waiting for bedpads to come back from the laundry
- **Compatible** with all pressure redistribution surfaces - assisting underlying microclimate therapies
- **Maintains structural integrity** when saturated, facilitating quick and easy disposal

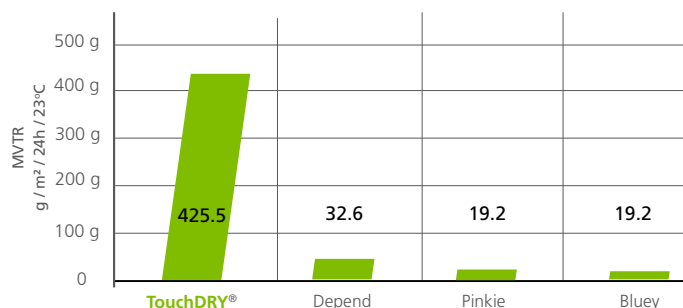

TOUCHDRY® DRIES QUICKLY TO KEEP YOUR PATIENTS DRY

TouchDRY® dries faster and is drier overall when compared to traditional bed pads - both disposable and reusable. Its low 'wick back' percentage reflects the effectiveness of TouchDRY's moisture wicking technology, supporting the microclimate around the skin, as well as general patient comfort.

TOUCHDRY® IS MORE BREATHABLE THAN TRADITIONAL DISPOSABLE BED PADS

Moisture permeability/breathability is measured as the Water Vapour Transmission Rate (MVTR). This is the measure of the passage of water vapour through a substance. TouchDRY® is 425.5g / m² / 24h / 23°C (see graph below) compared to 32.6 and 19.8 with other traditional bed pads (Test method ASTM E96-2012). The higher the score the more breathable the product.

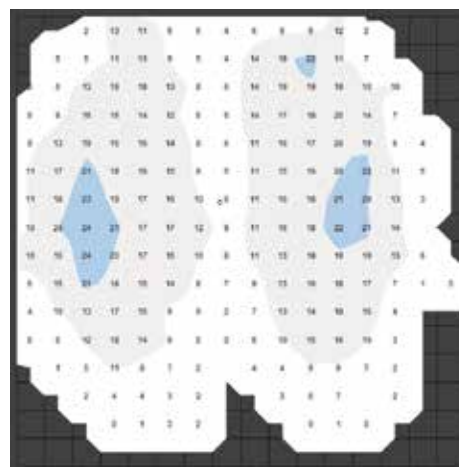

TOUCHDRY® IS SAFE TO LEAVE UNDER THE PATIENT

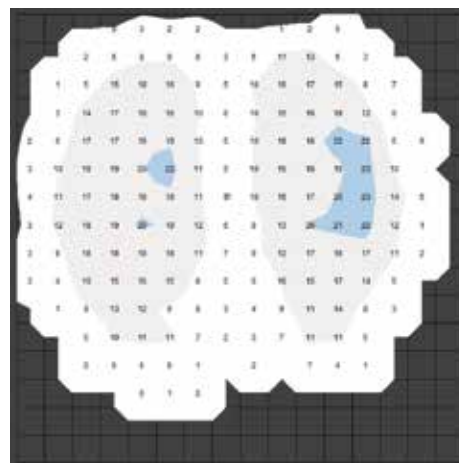

TouchDRY® products have no adverse effect on the pressure on a patient's skin. An independent pressure study proved little difference in pressure load to a patient when lying on TouchDRY®, when compared to no bed pad at all. Tests were conducted at 25kg, 50kg and 100kg and the blue patterns indicates where pressure occurs.

Contact Haines® for a full copy of the report.

No absorbent pad with 25kg of pressure

TouchDRY® with 25kg of pressure

TOUCHDRY® SIZES AND APPLICATIONS

FLOORDRY® ABSORBENT MAT

Haines®
MEDICAL AUSTRALIA

Increase safety and productivity
with FloorDRY®

DESIGNED AND TESTED IN AUSTRALIA

- **FloorDRY® is independently tested by AWTA**, one of Australia's leading NATA-accredited independent materials testing facilities, to ensure quality and consistency.
- **Holds 2.6 litres of fluid per square metre.** High absorption without leakage or loss of structural integrity represents superior efficiency compared to many competing products.

STURDY, TWO-LAYER CONSTRUCTION

Firm, air-laid paper top layer

Absorbs up to 2 litres of fluid (2.6 litres per m²)

Thick non-slip PE base

Contains fluid and ensures FloorDRY® remains in place when it is being stood on or walked over

DISPOSABLE WATERPROOF MATTRESS PROTECTOR

Fits single mattress 190cm x 91cm x 10-20cm deep

Haines®
MEDICAL AUSTRALIA

IDEAL
FOR HIGH
INFECTION
AREAS

The Disposable CPE Fitted Mattress Protector, with sewn in elastic to ensure it is held in place, is designed for:

- Hospitals - to protect mattresses in high infection risk situations
- Aged care - for use with infectious patients
- Hospitality/beauty - to increase the life of mattresses

BENEFITS

- **Waterproof** - protect your mattress from fluid damage
- **Economical** - often less expensive than linen wash costs
- **Improved infection control** - disposal of waterproof protector after use may offer advantages over wiping down procedures
- **Stays in place** - elastic sewn all around so fits on mattress well
- **Can be recycled** when unsoiled - contact Haines® for further information

Protective Sheets,
Pads & Covers

DISPOSABLE TROLLEY COVER

Reduce hospital acquired infections with the ability to inhibit the growth of bacteria¹

Haines[®]
MEDICAL AUSTRALIA

Haines[®] Disposable Trolley Covers are designed to replace existing reusable or plastic trolley covers, covering linen or other trolley-transported items, and reducing the risk of fluid or dust contamination during transportation or storage.

They offer a cost effective alternative to purchasing and washing reusable trolley covers and support infection control practices at your facility.

Haines[®] Disposable Trolley Covers can help your organisation meet Australian regulatory guidelines / standards:

- Australian Guidelines for the Prevention and Control of Infection in Healthcare (2019)⁷
- AS/NZS 4146:2000 Laundry Practice Standard⁸

FEATURES

- **Reduces hospital acquired infections by reducing bacterial growth** - Impregnated with anti-bacterial and antimildew chemicals including nanometer silver^{1,9}
- **Reduce annual costs** - Haines[®] Disposable Trolley Covers are impregnated with anti-bacterial and antimildew chemicals, including nanometer silver, which is widely known for its ability to inhibit bacterial growth⁹. This means that the frequency of trolley cover changes may be less than required with untreated reusable trolley covers thus saving time and money
- **Recyclable** - can be recycled when a new cover is needed
- **Environmentally-friendly** - reduces waste and environmental impact
- **Side pocket** on each cover for documentation
- **Identification label** - each cover is supplied with an easy to read identification label - this is to monitor length of use and provides an easy way to monitor required changes
- **Easy access** - Zip on front side of linen trolley allows easy access to the linen and covering when needed
- **Manufactured from 100% polypropylene, non-woven fabric** - 120gsm
- **Fire retardant** - AS 2755.2:1985 (R2013) failed to burn
- **Standard size** - Available in Medium or Large sizes or made to order custom sizes.
