

Longopac® Stand

– simply smarter

A bag system for efficient handling of waste products

- Hygienic
- Efficient
- Less CO₂

For a smarter waste management

HYGIENIC

- No contact with waste at any time.
- Spillage around the opening follows into the next bag.
- Easy cleaning.

EFFICIENT

- Always new bag in place.
- Faster bag changes - under 30 sec.
- Less cleaning.
- Flexible changes. You decide when the bag is full, no matter the volume of waste.

ECO-FRIENDLY

- 50% recycled material in all cassettes
(except Food & Pharma).
- 80% lower CO₂ emissions compared to traditional waste bags.
- 100% filling degree.
- Longopac is manufactured in 3-layer polyethylene, which provides low raw material consumption in combination with high strength.
- Lower weight and compact packaging mean less storage and transport costs.

Save CO₂ with
Longopac

 Longopac®

invented by PAXXO

Less emission of greenhouse gases

Global emissions of greenhouse gases have steadily increased, and it is now crucial that the emissions begin to decline at a rapid pace. One step is to switch to Longopac, as compared to a traditional waste bag, you reduce your CO₂ emissions by 80% and plastic consumption by 70%.

Compared to 1980, we have halved the thickness of our already extremely thin, yet strong film and tests show that it has become the world's strongest PE film (in relation to thickness). Our products have always been environmentally friendly (green) and our production becomes greener and more sustainable every year.

Calculate your environmental savings with Paxxo's CO₂-calculator on the website!

THIS IS HOW IT WORKS

Step 1:
The bag cassette is sealed at one end with a cable tie. When the bag starts to fill or you simply want to change it, you pull the bag down to feed new material out of the cassette.

The whole process takes less than **30** seconds!

Step 2:
To seal the bag, use a cable tie at the top of the waste.

Step 3:
Attach another cable tie approximately 5cm above the first cable tie and cut the bag material between them.

Longopac® Stand CLASSIC

Classic Mini / Mini Food

Classic Midi / Midi Food

Classic Maxi / Maxi Food

Type	Version	Item. No.	Measures	Weight	Sign Holder

H = Height, W = Width, D = Depth, l = Inlet

Focus on environment, hygiene and efficiency

The Classic family is divided into several groups; **Classic**, **Classic Inox** and **Classic Food**, these in turn are divided into the three sizes **Mini**, **Midi** and **Maxi**.

Classic Food is of course intended for the food industry and therefore the base plate and cassette holder are designed in PP plastic with blue metal detectable material. The legs and wheels are created in stainless steel, which together provide a stand with a durable design that meets the hygiene requirements set in this industry.

The Classic Mini is slightly different from Midi and Maxi as it is equipped with a base plate in ABS/PC and a cassette holder in PP plastic. Classic Midi, Maxi and Recycling are equipped with a base plate and cassette holder in PP plastic, but in all versions the legs are aluminium and the wheels are galvanized steel.

Classic Midi

Classic Inox is just like our standard Classic equipped with a base plate in ABS/PC and cassette holder in PP plastic, but instead the legs and the nylon-covered wheels are in stainless steel to withstand regular cleaning.

The latest addition to the family is the Classic Midi, where the bottom plate and cassette holder has a new shape, and the legs are in a new position at the back of the stand.

This new square profile with slightly rounded corners means that the stand now fits better along a wall and thus takes up less space. The new cassette holder has also been redesigned to facilitate its cleaning. The legs have been placed further back on the base plate to give more space when changing the bag, but also to prevent the bag from getting stuck between the legs.

The choice of material (PP) in all the plastic parts is another well-thought-out detail to make it easier to sort and recycle the stand when it is time to replace it.

Classic Recycling

The Stand family also includes Classic Recycling, which is primarily intended for the handling of plastic, paper or other material of larger volumes that are then intended to be compressed for recycling.

This stand is only available in the Maxi version and for this the Longopac Ultra Lean cassette is advantageously used, which is available in standard or perforated design, which removes air during compression.

To prevent the recycling material from crawling out of the bag, there is a specially designed adaptor disk to place in the opening that prevents this.

You can find the adaptor disk in our accessories.

The system for tough and demanding environments

Dynamic Mini / Mini Pedal

Dynamic Midi / Midi Pedal

Dynamic Maxi / Maxi Pedal

The **Dynamic** stands are designed to withstand lots of stress and very tough environments which often requires high hygiene and therefore regularly must be sanitised.

The stands are designed to give the user a more open work surface to facilitate bag change and cleaning. Dynamic are equipped with brakes on the front wheels, which are also larger than on traditional garbage stands.

You choose which side of the cassette holder you want to mount the supplied cable tie holder and the pair of scissors on.

Dynamic Pedal stands have the same characteristics as the regular Dynamic, but are also equipped with a pedal and lid. The lid has been equipped with a damper to give it a softer closing. When the pedal is pressed, the lid is raised to an 85 degree opening for easier handling of waste or packaging.

The lid on the Dynamic Pedal can also be set completely open at a 100 degree angle to facilitate a faster loading of a new cassette. All plastic parts are made out of a metal-detectable material and the stand is loaded with any of our *Longopac Mini, Midi or Maxi* cassette.

Type	Version	Item. No	Measures	Weight	Sign holder
Dynamic	Mini	34650 Fzb	H x W x D: 955 x 395 x 405 mm	6,8 kg	34651 A4P 34652 A5L
		34660 Inox	l: Ø 230 x 230 mm		
Dynamic	Mini Pedal	34670 Fzb	H x W x D: 970 x 395 x 485 mm	7,7 kg	34651 A4P 34652 A5L
		34680 Inox	l: Ø 230 x 230 mm		
Dynamic	Midi	34600 Fzb	H x W x D: 955 x 495 x 555 mm	8,7 kg	34653 A4P 34654 A5L
		34620 Inox	l: Ø 320 x 280 mm

		34630 Inox	l: Ø 320 x 280 mm		
Dynamic	Maxi	34700 Fzb	H x W x D: 950 x 560 x 575 mm	9,7 kg	34655 A4P 34656 A5L
		34710 Inox	l: Ø 360 x 360 mm		
Dynamic	Maxi Pedal	34720 Fzb	H x W x D: 970 x 560 x 655 mm	11 kg	34655 A4P 34656 A5L
		34730 Inox	l: Ø 360 x 360 mm		
Dynamic	Midi UBS	34500	H x W x D: 650 x 280 x 560 mm l: Ø 430 x 165 mm	6,4 kg	34653 A4P 34654 A5L

H = Height, W = Width, D = Depth, l = Inlet

Fzb is galvanised steel. Inox is stainless steel.

With focus on hygiene and ease of use

Dynamic Midi UBS

Our stands in the Dynamic family fit perfectly into spaces that are demanding and place very high demands on cleanliness and hygiene.

Our **Dynamic UBS** (*Under Bench Solution*) has been specially designed for these environments where there is also a limited space. Dynamic UBS is a flexible stand for restaurant kitchens, showrooms and catering.

Unlike Dynamic Mini, Midi and Maxi, which stands firmly on the floor, we have designed Dynamic UBS to fit perfectly under already existing work tops. Dynamic UBS has the same dimensions as the rectangular plastic containers that are otherwise common on the market, and which in many cases are already used under the work tops at various café chains and restaurants.

Unlike the rectangular plastic containers, we have equipped the UBS stand with wheels to make it easier for the staff to roll the stand out when changing the bag. To make this stand even more easy to use, we have further simplified changing the bag by designing the side so it folds down with a simple grip of the hand, which then gives full access to the bag. After the bag is replaced, the side folds up again with a click and the stand is rolled back into its place. *It can not be simpler than that!*

Dynamic UBS is made of powder-coated steel and is easily loaded with any of our *Longopac Midi cassette*.

Best solution for demanding cleaning requirements

Dynamic Wire Base Mini

Dynamic Wire Base Maxi

The idea we had when we developed the **Dynamic Wire Base** was a product for our food segment that would withstand tougher cleaning agents and could be foamed with advantage. In addition, you do not need to lay down the rack when it is drying, as the grid at the bottom enables drainage and faster drying. It can of course be used in all environments and segments where these benefits are necessary.

Like the other stands in the Dynamic series, they are designed to provide a freer work surface that facilitates two aspects; bag changes and cleaning. The Dynamic Wire Base is also equipped with larger front wheels than on traditional garbage stands and we have added with brakes to them. You choose yourself which side of the cassette holder you want to mount the supplied cable tie holder and scissors on.

Type	Version	Item. No	Measures	Weight	Sign holder
Dynamic	Mini Wire Base	34665 Inox	H x W x D: 970 x 395 x 485 mm l: Ø 230 x 230 mm	6,7 kg	34651 A4P 34652 A5L
Dynamic	Maxi Wire Base	34715 Inox	H x W x D: 951 x 560 x 574 mm l: Ø 358 x 358 mm	8 kg	34655 A4P 34656 A5L

H = Height, W = Width, D = Depth, l = Inlet

Not enough space? Put the holder on the wall

Our wall-hung models are designed to be mounted where the space is limited and narrow and limited surfaces. They are also better where there are greater demands on floor hygiene than regular floor stands, as the placement on the wall facilitates all cleaning around the stand.

This makes this series excellent for spaces such as bathrooms and toilets.

Classic Wall Mini and **Wall Maxi** have cassette holders made out of polypropylene with an aluminium wall bracket. These are also available with lids.

Dynamic Wall Mini is made out of white powder-coated steel, while **Dynamic Wall Mini with lid** and **Wall Midi** are made out of silver-coloured powder-coated steel.

Classic Wall Mini

Classic Wall Maxi

Type	Version	Item. No	Measures	Weight	Sign holder
Classic	Maxi	30080	H x W x D: 460 x 580 x 660 mm l: Ø 425 mm	2,4 kg	30453 A4P 30454 A5L
Classic	Mini	31420	H x W x D: 365 x 390 x 450 mm l: Ø 305 mm	1,7 kg	30451 A4P 30452 A5L

H = Height, W = Width, D = Depth, l = Inlet

Dynamic Wall Mini

Dynamic Wall Mini + lid

Dynamic Wall Midi

Use the sign system for a smooth and easier sorting

To further improve garbage and waste management, Paxxo has designed a smart and flexible sign system for both Classic and Dynamic stands.

You mount the signs in an easy and smart way to increase the understanding of how the waste should be sorted at e.g. a sorting station. These signs fit all Classic, Dynamic and Wall solutions except Dynamic Wall Mini.

We have two types of signs available; A4-Portrait and A5-Landscape and these can be found in a Nordic or an International version.

Signs and sign holders for Classic & Dynamic

See product charts in folder for specific item numbers.

In the tables of the various stands, it is clearly visible which holder fits which stand.

The signs come in an editable PDF file where you can adapt the text to your needs and language, then you easily print them on your laser printer.

Nordic Edition

Accessories

Cable Tie Holder Classic
 Standard - greyItem no. 30470
 Metal detectable - blueItem no. 30476
 Cable tie holder with integrated holder for Scissors suitable for Mini, Midi and Maxi.

Cable tie holder for Dynamic
 (holder only)
 Standard - grey Item no. 30420
 Metal detectable - blue Item no. 30426
 The cable tie holder for the entire Dynamic series.

Rubber band
Item no. 3102
 The rubber band can be used together with all Longopac cassette holders. Effectively locks the cassette in place and prevents it from unravelling.

Scissors kit for Dynamic
 Metal detectable - blue Item no. 34609
 Kit with metal detectable scissors, scissor holder and stainless steel wire.

Safety knife - Cutter kit
 Blue Item no. 30440
 Kit with cutter in metal detectable PP. Wire in stainless steel and cable ties in metal detectable PA.

Adjustable plate for Classic Mini
Item no. 31480
 Reduces the consumption of bag material and the size of the bag. Primarily intended for use with heavy waste.

Lid for Classic Mini & Maxi
 Mini Item no. 31140
 MaxiItem no. 30140

Adapter disc for Classic Maxi
Item no. 30170
 Reduces the aperture for easier compression of e.g. recycled plastic.

Connector for all Classic
 Item no. 33750
 Connects two or more stand products simply and securely. It is also possible to connect Maxi with Mini.

Frame for Classic Maxi
 Item no. 33900
 The frame holds the bag in place.

Frame for Classic Mini
 Item no. 33890
 The frame holds the bag in place.

Dynamic ESD Kit Wheels
Item no. 34616
 Contains four castor wheels, two of them with brakes. Replaces the original wheels on stands used in ESD restricted areas.
