

Centurion CLEAR

Concept

The Centurion CLEAR is a full-height motorised turnstile which combines high performance and aesthetics. The combination of a stainless steel frame with glass panels provides a high security solution with an open, friendly look. Quality, reliability and easy operation are the hallmarks of the Centurion CLEAR making it ideal for high security applications where the full automatic identification of people is required.

Centurion CLEAR is a bi-directional turnstile managed by state of the art control electronics. The 120° openings ensure comfortable, easy and safe access for one person. Integrated sensor scans the 'no go' zone and if any presence is detected in this zone an external alarm is triggered and there is the additional option to automatically reverse the turnstile's motor to push the unauthorized person back.

Authorised Passage

Illegal Passage

The Centurion CLEAR's motor drive unit provides smooth silent operation coupled with reliable and maintenance-free running, in addition it provides a high level of safety - in the event the turnstile senses an obstruction it will stop moving.

Intelligent

The Centurion CLEAR automatically sets its speed based on how hard the user initially pushes the turnstile to set it in motion

Tailored to Suit

The Centurion CLEAR can have the majority of its settings like torque, speed, timeout period, sensitivity, fire alarm integration, brake performance and card buffering adjusted on site, or remotely to ensure its performance best matches the site requirements

Remote Control

The Centurion 220 can be supplied with a desk mounted console or PC software to provide the reception team with easy control of the turnstiles functionality to facilitate visitor entry, simplify alarm monitoring and change operational modes.

In addition the turnstiles can be configured to allow remote diagnostics allowing engineers to dial in and undertake remote maintenance, servicing, configuration and trouble shooting saving on expensive site visits.

The Centaman advantage...

- *Technically superior products*
- *Sydney based 24/7 support helpline*
- *Local offices for a faster response*
- *Flexible support packages*
- *Supply only to turnkey project delivery options*
- *14 Years experience in successfully delivering entrance control solutions*

Key Benefits

High Security

- Prevents climb over attempts
- Deters Tailgating

High End Aesthetics

- European Design
- Architect Inspired
- Transparent Design
- Stainless steel and glass materials

Reliable

- MTBF of 3,000,000 operations
- 24 month warranty
- European Manufacture

Advanced Technology

- Remote Turnstile Diagnostics
- Bespoke PC monitoring solution

More Secure

- Monitors the 'No Go' Zone
- 2 Security Levels
- Optional Tailgate Detection Electronics

Applications

- Corporate Offices, Government, Airports, Leisure Clubs, VIP Areas
- Leisure Clubs

Specification

Dimensions

Standard: 1610(L) x 1610(W) x 2400(H)
Lane width 705mm

Electrical

Power Supply : 12 V DC
Current : Standby 0.4 A
Consumption : Operational 6 A

Operating Temp : -10°C to 50°C (with heater)

ACCESSORIES

Holders for accessories:

Holders for placing of identification readers or other accessories (for example: LED information panel).

Lighting:

Lighting of turnstile interior - standard.

Anchoring frame:

Steeley frame to fix the turnstile, for example through the stone block paving.

LED information panel:

Lane status and user instruction

Touch control panel

- turnstile manual control
- turnstile manual unblocking

Battery Back-up:

During a power failure the accumulator ensures its continuous operation for a period of minimally 6 hours.

Counter:

Turnstile can be equipped with the passage counter

Materials

Glass : 8 mm Tempered Safety
Frame : Stainless Steel
Push Bar : Stainless Steel

For Remote Turnstile Maintenance access to the sites network is required and the service is subject to a support agreement

About CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe.
