PANORAMA
Perimeter Frame Umbrella

Architecturally designed and engineered umbrellas showcasing the largest canopies in our range.

PANORAMA

Perimeter Frame Umbrella

Extend your capacity to cater under the ultimate outdoor umbrella. Boasting the largest canopies in our range, the Panorama provides serious all weather protection.

- Designs that place structural columns to either the centre, side, or corners of the square or rectangle canopy allow for the optimum layout of your covered space.
- Off site prefabrication and modular construction ensure an efficient installation process, minimising disruption to your business.
- Engineered for winds up to an impressive 148kph as standard, the Panorama can be customised for even greater wind speeds, making it ideal for elevated and exposed locations.
- Available in centre column, cantilevered or gazebo style post arrangements, in a multitude of freestanding sizes. Custom sizing is also available.
- An architectural grade, weldable PVC canopy that is waterproof, heat reflective, and UV stabilised, provides a dry and comfortable space undercover.
- The sophisticated PVC formulation includes UV inhibitors that protect the fabric and the colour pigments from damage and fading, ensuring the longevity of the canopy.
- An additional PVDF coating ensures ease of cleaning making it ideal for commercial environments.
- Accessory options include PVC curtains, gutters, dual structure single skin, corporate branding, lighting, heaters, electrical access points and speaker systems.

PANORAMA

Features

With an extensive range of designs, sizes, and accessories, the Panorama offers a cost effective and functional alternative to an outdoor room.

Strong and durable materials provide sheltered open spaces without the need for numerous interior posts, or the heavily reinforced foundations of conventional structures.

Flexible Designs

Centre, cantilever, or gazebo style designs give you the flexibility to place structural columns to suit your view and ensure the best use of space while working around any existing buildings, entrances, and walkways.

Multiple Panoramas can be joined or integrated under one continuous membrane for an all weather structure, customised to perfectly fit your site.

Quick and Efficient Installation

Pre-fabricated designs, measured for your site but made in our factory, ensure a quick and efficient installation process, minimising the down time of your business.

Compatible Accessories

A robust framed perimeter reinforces the canopy and facilitates the easy installation of clear drop blinds and rain guttering for year round use. Heating and lighting, power/usb ports and speaker systems, can all be pre-wired into the umbrella frame to enhance your customer's experience, and maximise the use of your outdoor space.

Corporate Branding

Both the canopy and frame come in a large range of colours to compliment your exterior and work in with your brand.

Business signage can also be printed directly on to your canopy using colour fast inks, for accurate colour matching and a premium finish.
