

Skin Testing Instruments for R&D

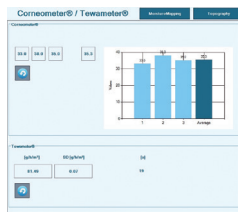

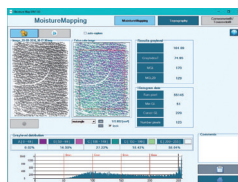

MoistureMap MM 100

- featuring **capacitance imaging** comparable to the L'Oréal SkinChip®*
- graphic information on **hydration distribution** (MoistureMapping) and **micro-topography** of skin and other tissues (e.g. textiles, plants)
- new software** for analysis of the results
- improved **topographic parameters** for assessing skin aging: anisotropy and corner density
- in-vitro adapter** available
- combination with **Tewameter®** and **Corneometer®** probes possible

* licenced worldwide under the L'Oréal patent for the Skin Chip® (EP 1 438 922 B1)
