

Delivering nasal high flow with Optiflow™ at home  
and in long-term care

# Introducing the F&P myAIRVO™ 2, delivering respiratory support and airway hydration with a focus on comfort and ease of use.

The F&P myAIRVO 2 has been designed specifically to be an integrated solution for delivering nasal high flow with Optiflow™. Fisher & Paykel Healthcare's leading humidification technology allows the AIRVO 2 to comfortably provide high flows of air/oxygen mixtures to spontaneously breathing patients, through the unique Optiflow nasal interface.

## Optiflow™+ Nasal Interface

- Soft, flexible prongs
- Wide-bore design reduces gas jetting
- Prongs contoured to the patient's nose

## Adjustable temperature and flow settings

- Three temperature settings (37, 34, 31 °C) help achieve comfort and compliance
- Integrated flow generator delivers a wide flow range (2 - 60 L/min) for both pediatric and adult patients - no wall air supply required

## Airspiral™ heated breathing tube

- Dual spiral heater wires and unique integrated temperature sensor
- No separate temperature probes or heater-wire adapters required

## Supplementary oxygen (when required)

- Oxygen can be added from a wall supply or cylinder
- Inbuilt ultrasonic oxygen analyzer requires no calibration, service or replacement
