Strong And Sturdy Café Barriers

Café barriers are a very affordable way to maximize your outdoor seating area and increase revenue. Barriers can be branded with your logo or advertising message, **using 100% marine-grade acrylic fabric to match an existing awning or a PVC insert.**

Our café barrier frames are steel powder-coated 50mm round tubing or square, solid and sturdy not too light. All barriers are sail tracked to frames with a choice of single/double interlocking feet or in-ground socket and sleeve. Café Barriers Meet Melbourne City Council Requirements.
