

Air Cushioning Machine

800mm

#27900

**Automated
Inflation process**

**Durable
Materials**

**Versatile Film
Compatibility**

**Visual Screen
Interface**

The Air Cushioning Machine is a versatile, high-speed system that produces pillows and bubbles on-demand for various packaging needs. With an inflation speed of 18 meters per minute, it's ideal for medium-sized enterprises, enhancing production efficiency and reducing time costs. The machine handles different types of cushioning films and features intelligent temperature control to minimize material waste, ensuring product integrity during transportation. It's a reliable solution for improving packaging quality and efficiency.

Features

- Fast inflation and stability
- Durable industrial materials
- Enhanced technical safety
- Automated inflation process
- Compatible with various films # 27906, 27907, 27908, 27909
- Data tunable settings
- Visual screen interface
- Multipurpose machine
- Versatile film compatibility
- Speed: 18m/ min
- Film Type: Air Pillow, Air Bubble
- Width Film: 800mm max

Specifications

Film type	Air Pillow, Air Bubble, Kraft
Max film width	Paper Air Film, Kraft Paper
Speed	Air Bubble 800mm/32inch
Voltage	18m/min,59feet/min
Power	100~120VAC 200~240VAC
Weight	350W 9KG 300(L)*
Machine Size (mm)	360(W)*345(H)
