

A FRESH APPROACH PVC MEAT FILM

FRESH APPLICATIONS

Integrated Packaging offers a range of quality food films with benefits for all kind of food particularly meat, seafood and poultry.

We have developed a comprehensive range of films with different attributes to meet market expectations. This resulted in a wide range of quality product innovations that will improve the presentation, freshness and shelf life of your product, whilst meeting the highest global food safety standards.

Our films are highly transparent and glossy, have exceptional anti-fog properties and have a good moisture and oxygen transmission rate to ensure your product remains fresh, achieves optimum shelf life and maintains its visual presentation. In addition, our high strength film is easier to handle, minimizing the risk of tears, providing added protection to reduce spoilage and wastage.

With a range of gauges, widths and roll lengths, our films are suitable for any packaging process, whether that be manual, semi-automatic or automatic. Should you require a 13 micron wrapping meat film or 150 micron protective meat film, Integrated Packaging can offer a film to suit your needs.

FEATURES AND BENEFITS
