VELA Tango 700E

VELA Tango chairs offer independence at home and work in a user-friendly design. By sitting down in a VELA chair, you can perform your usual standing activities safely and comfortably without draining your energy. All because of a safe handbrake, easy-rolling wheels, and stable sitting comfort.

STABILITY AND MOBILITY

The brake ensures that you get stability for different activities. And the smooth-running wheels make you mobile, so you can easily move around at home while sitting down.

REACH NEW HEIGHTS

The electric lift lets you conserve energy when you reach for the cupboard or emptying the dishwasher. This feature can also be used as help to stand up from the chair.

OPTIMUM COMFORT AND ERGONOMICS

You can adjust the chair to get the best possible ergonomics and comfort to suit your exact needs – and the chair lasts for many years.

SAFETY EVERY DAY

You sit safely and securely – the brake ensures that. You also benefit from stable armrests and a good, supportive backrest. So you feel completely safe when you sit in our chair.

HELP TO STAND UP

The electric lift helps you stand up - with a touch of a button, the seat gently raises, and you can safely stand up with a minimum of effort. And the chair gives you the necessary support while regaining balance.

SAVE ENERGY

The electric lift ensures that you don't use unnecessary energy when putting plates in the dishwasher, reaching a sweater at the top of the wardrobe or brushing your teeth.

MAKE EVERY DAY EASIER

A VELA chair can make cooking, personal care, and other necessary daily activities more effortless and manageable. By doing more daily tasks by yourself, it is also possible to become less dependent on the help of others – and independence leads to a better quality of life.

Danish Quality

VELA is a Danish family-owned company, founded in 1935 by Vermund Larsen. VELA is headquartered in Denmark and has its own development department, production and upholstery workshop.

CHAIRS WITH CARE AND PRECISION

At VELA, we constantly focus on optimising safety, functionality and design in collaboration with our occupational therapists, which always ensures that there is a focus on ergonomics and comfort for the

users. We take into account that our chairs are often exposed to severe wear and tear for many hours daily. Therefore, VELA uses sturdy mechanical parts and chairs are covered with extra durable materials to keep them clean and functional for many years.

All the chairs from VELA are produced in Denmark. We do not produce the chair before it has been ordered, and it is, therefore, possible for us to offer individual customisations.
