Lubrificazione e temperatura

Tutti i motoriduttori BLCM sono forniti completi di lubrificante sintetico viscosità 320, pertanto possono essere installati in qualunque posizione di montaggio e non necessitano di manutenzione.

Temperatura ambiente $0 \div 40^\circ\text{C}$ (in assenza di congelamento ed in assenza di condensa).

Per temperature diverse, contattare nostro UT.

Lubrication and temperature

Permanent synthetic oil long-life lubrication (viscosity grade 320) makes it possible to use the BLCM worm gearmotors in all mounting positions; for this reason they can be installed in any assembly position and do not require maintenance.

Ambient temperature $0 \div 40^\circ\text{C}$ (in the absence of freezing and condensation).

For temperature outside this range please contact our technical dept.

Quando il carico radiale risultante non è applicato sulla mezzes-
sia dell'albero occorre calcolare quello effettivo con la seguente
formula:

*When the resulting radial load is not applied on the centre line
of the shaft it is necessary to calculate the effective load with the
following formula:*

b	43	50	64	76	95

$$R_c = \frac{R_2 \cdot a}{(b+x)} \leq R_{2MAX}$$

$$R \leq R_c$$

a. b = valori riportati nella tabella

a. b = values given in the table
