Sturdy and extendable panel lifter.

The popular dry wall panel lifter enables one person to work alone installing panels to ceilings or vertical walls. This unit dismantles to fit in the boot of a car for easy transportation. It is ideal for the Hire and Rental Industry, Wall and Ceiling Contractors.

It reaches to 3.4m and is easy for one person to operate. With foldable tripod legs and 5 inch (125mm) castor wheels along with no tool assembly it is therefore very portable.

To accompany this product we highly recommend the Crommelins Panel Lift Caddy, which you can view [here](#), to store all the pieces of the panel lifter together in one place and assist in transportation.
