

Track & Trace by Uhlmann.

For the seamless traceability of pharmaceutical products.

More reliability: An unrivaled system solution

Every packaging unit can be marked with a unique, serialized 2D code that includes all relevant information relating to production. Furthermore, this information can be linked in the Uhlmann tracking database with the code data of the next largest packaging unit.

The information from a blister code, such as forming-, sealing pressure, sealing temperature, is linked with the code data on the carton. This in turn is linked with the code on the shipper case and that with the code on the pallet. Parent/child relationship is the term for this indepth information principle.

It offers great advantages in terms of safety against counterfeiting as well as product and process reliability; added value beyond the mandatory requirements that brings you notable benefits.

Thanks to parent/child relationship, the pharmaceutical manufacturer has access to much more information.

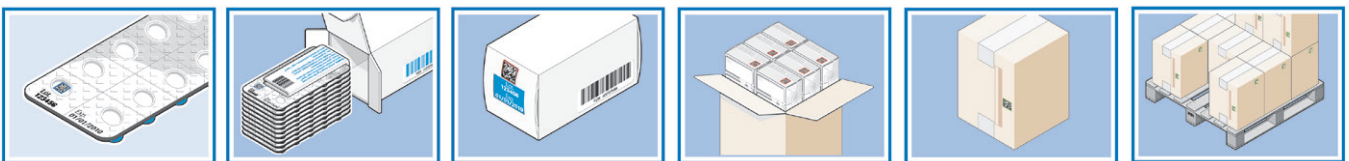

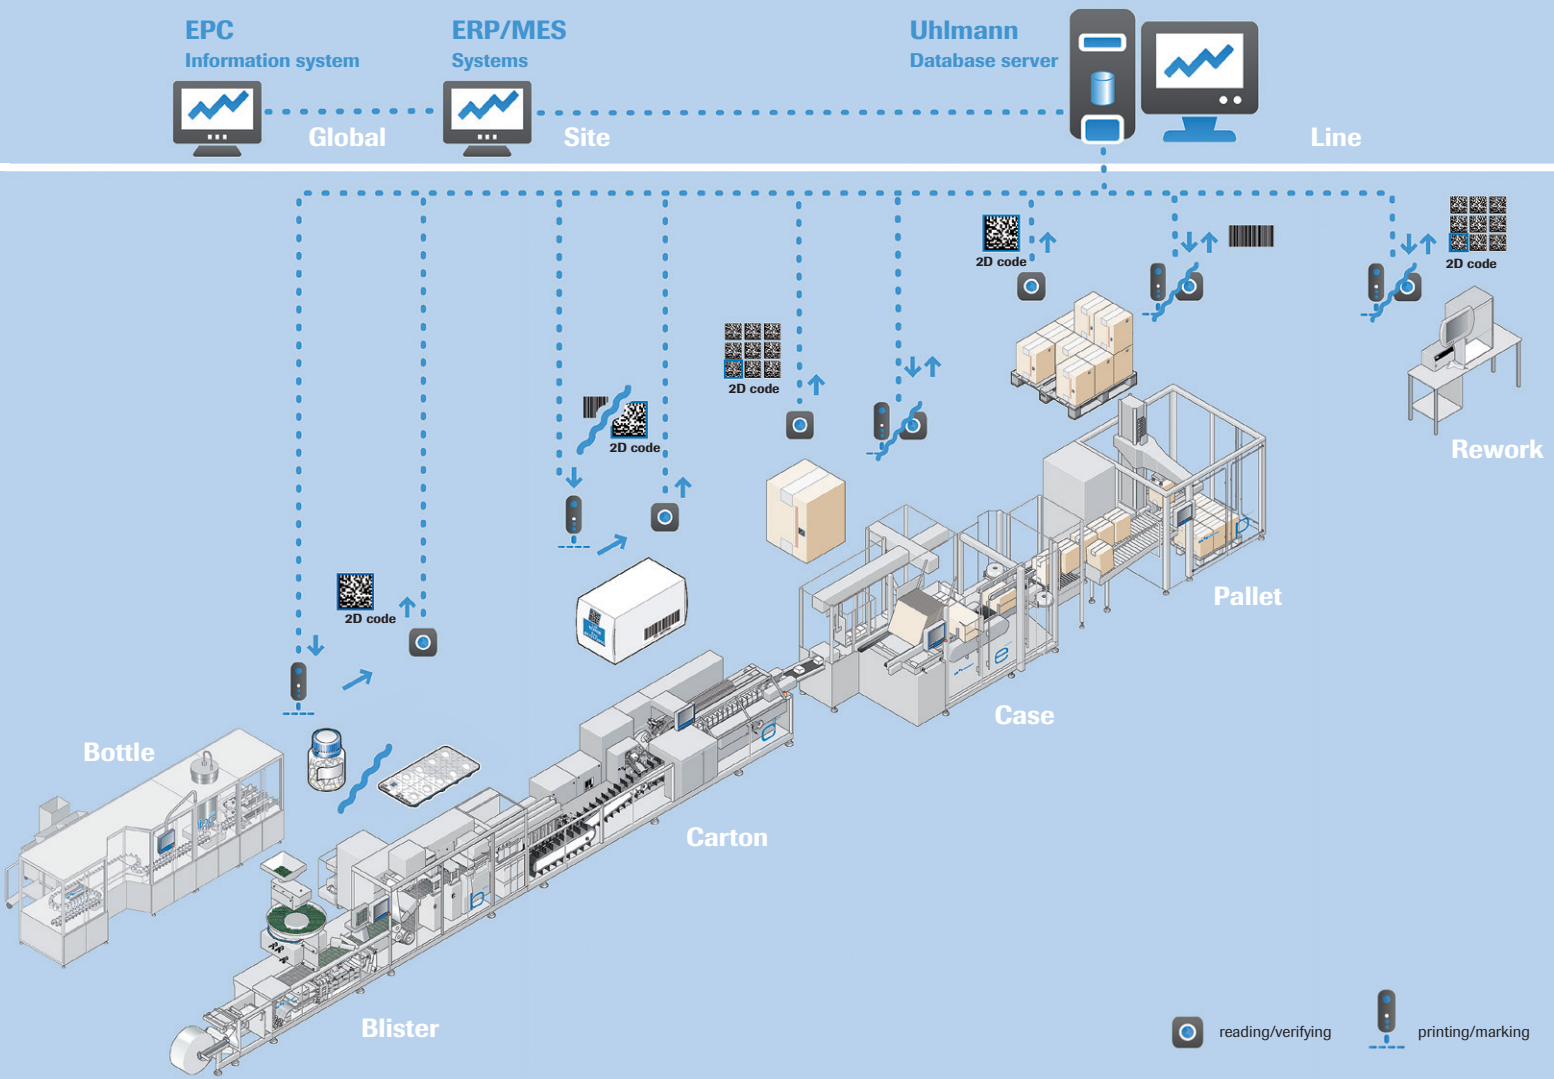

The 2D code allows verification at any time whether a product is original or counterfeit. Any mix-up of unprinted blisters is avoided, production parameters can easily be checked at a later date, faulty packages sorted out reliably and possible product recalls coordinated accurately.

Track & Trace by Uhlmann.

More value:

Data management and equipment by Uhlmann

Track & Trace by Uhlmann.

One-stop-shopping at its best.

Uhlmann offers Track & Trace as an innovative, integrated system solution from a single source. This allows flexible response to individual requirements and customers only need to deal with one contact person. This specialist helps put a customized Track & Trace solution together.

Upgrade? No problem!

Track & Trace by Uhlmann can be integrated in new machines from the start and existing machines can easily be upgraded.

Uhlmann offers a wide range of innovative solutions suited to each respective case.

The benefits of a system solution:

- Integration of diverse printing and marking technologies and label applications into Uhlmann machines or those of other manufacturers
- Intelligent OCR/OCV inspection systems as well as the application of coordinated printing/marketing systems
- Solutions for primary, secondary and tertiary packaging as well as for inventory and distribution processes
- Seamless serialization solution from the packaging line to the corporate IT system
- Turnkey project management
- Pilot installation with customer support, execution of concept studies
- Competent support service
