

HERCULES HEAVY DUTY HD668 LOADER

HIGH PRODUCTIVITY

Load sensing hydraulic system provides consistent and precise blade movement

HIGH RELIABILITY

A-frame designed drawbar provides strength in all blade positions

COMFORT

Control layout with low lever efforts for reduced operator fatigue
Large, easy to open hood side door makes service access easier

SPECIFICATIONS:

Operation Weight: 21,000kg

LxWxH: 8,541*3,092*3,458

Rated Load: 6,000kg

Max Dumping Height: 2.874m

Engine Model: CAT Nominated Engine

Rated Power: 245HP

Rated Speed: 2,200r/min

Steering System: Articulated hydraulic steering

Bucket Capacity: 4.2m³

Transmission Type: Countershaft, Powershift, EH Control

Tyre size: 23.5-25

Operating Weight with Standard Bucket: 20,550kg

Advanced Cooling System:

- *43 degree standard cool package suitable for most applications
- 50 degree high ambient cooling package optional for hot region
- High debris cooling package for really heavy dust work environment

Efficient Hydraulic System

- *Full hydraulic priority steering and Joystick make operation easy and comfortable
- Single pump flow shared implement hydraulic system delivers low fuel consumption and high efficiency
 - Short cycle times help move more material faster
 - Transmission and sump guards standard

- Rear hinged HD protective guard standard

WARRANTY:

2 year/2000hr parts & labour (conditions & variations apply)

Engine: 3 year/ 4000 Hr

Misuse of accessories are not covered by Hercules warranty
