

Dehumidifiers

Desiccant wafer wheel dehumidifiers

Very effective in achieving low humidity. Used in a variety of applications such as water damage restoration, food, pharmaceutical, aquatics and mould prevention. Can be purchased as stand-alone electric, portable and customised into a custom Air Handling Unit (AHU). Many different models are available. Desiccant dehumidifiers are a powerful, simple design making them very reliable and easy to maintain over other dehumidification processes.

Features:

- Very effective and reliable
- Small models stackable, lightweight and easy to transport
- Technologically advanced Swedish made desiccant wheel
- Easy to service and maintain
- Available in Stainless steel
- Adaptable to existing facilities and AHU
- Pre-cooling and post cooling available
