

# COLA

Covered Outdoor Learning Areas provide an all weather cost effective solution to increase play and learning spaces while providing protection from rain and the sun's harmful UV rays.

Individually designed, our COLA structures feature wide spans and column spacing making them a perfect solution for covering large areas such as basketball and tennis courts. Design elements may include curved or gable roof lines, roof overhangs, varying heights, end and side screening and even colour options.

Transform your schoolyard into a functional outdoor environment with a Weathersafe COLA. We can even incorporate covered walkways making the space perfect for covered outdoor learning and assembly areas.

## Typical applications:

School outdoor areas, basketball court covers and sporting facilities

## Key design advantages:

Covers large spans cost effectively and provides a permanent waterproof solution

### **Flexible design**

It's about tailoring a solution to suit your needs and are individually designed to suit your available space and requirements.

### **No size restrictions**

Our COLA structures can be built to virtually any size. From smaller sheltered learning spaces to ultra large spans covering multiple basketball courts.

### **Fully engineered**

Compliant, individually designed and engineered structures to suit your location.

### **Options and features**

- Part walls and infills
- Bird proofing options
- Minimal site disruption
- No Size restrictions
- Design and Certification
- Fixed Price quotations
- Superior strength and reliability
- Covered Walkways

# Commercial Shade Solutions

Operating since the early 1950s, Weathersafe has grown to become the leading provider of commercial outdoor shade and shelter solutions. From large span fabric structures and hard roof outdoor learning areas to bespoke retractable roofs we've got you covered. We are experts in tensile membrane architecture and all weather outdoor protection.

We custom design, engineer, manufacture, install and maintain premium all weather structures, and provide smooth project management by handling project communication, documentation, council applications, approvals and private certification. We pride ourselves in customer service and would very much like to be part of your next project, please feel free to get in touch to discuss your requirements.

## **Design and Engineering**

Our in house designers, engineers and draftsmen will provide 3D CAD drawings and renders of your project to help you visualise the end result. We use state of the art tension membrane software to ensure the structural integrity of all designs and to provide you with the most accurate up front quotation.

## **Competitive fixed price quotations**

With over 50 years industry experience we believe we offer the best in design, materials, price and service. If, by chance you do receive a lower priced quote there's probably a reason. Please take some time to compare our offer with our competitors then feel free to call us to discuss.

### **Manufacturing process**

Weathersafe proudly manufacture our shade structures locally. We work with a range of highly qualified and respected suppliers who are dedicated to work with us ensuring our products meet and exceed Australian standards.

### **Project management**

Our highly experienced team will manage your project at every stage. This includes design, drafting, engineering, council approvals, manufacture, compliance, installation and site clean up, ensuring a hassle-free process.

### **On site compliance**

We take safety very seriously and believe that we are the most compliant in our industry. We have complete documentation available and are accredited with Spotless, DPTI, LGA and DECS. All relevant staff have necessary police, DCSI and Catholic School clearances and carry all required licences and tickets required for safe and compliant installation.

### **Warranties and maintenance**

We stand by our entire range of products and offer the strongest warranties for both materials and installation in the industry. Our structures will have a very long life if well maintained. We offer inspection and maintenance services to give you peace of mind your asset will perform well into the future.
