

Lift Table

Australia's best and most trusted
Lift Table range by Safetech

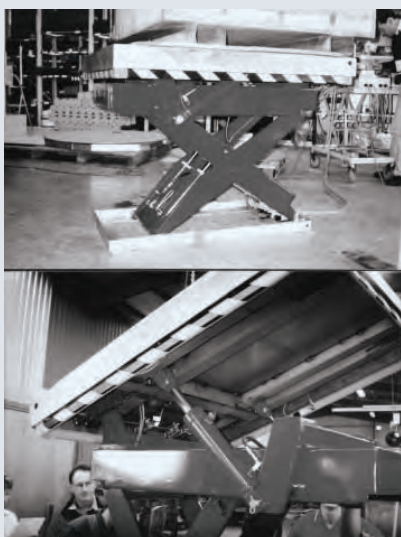

Heritage & Experience

Traversing Scissor Lift with platform - Laminex VIC

Lift Tables brochure - 1998

Lift table with tilting platform

Over 30 years of vertical lifting experience

Since 1985 Safetech has been designing and building lifting solutions for Australian industry.

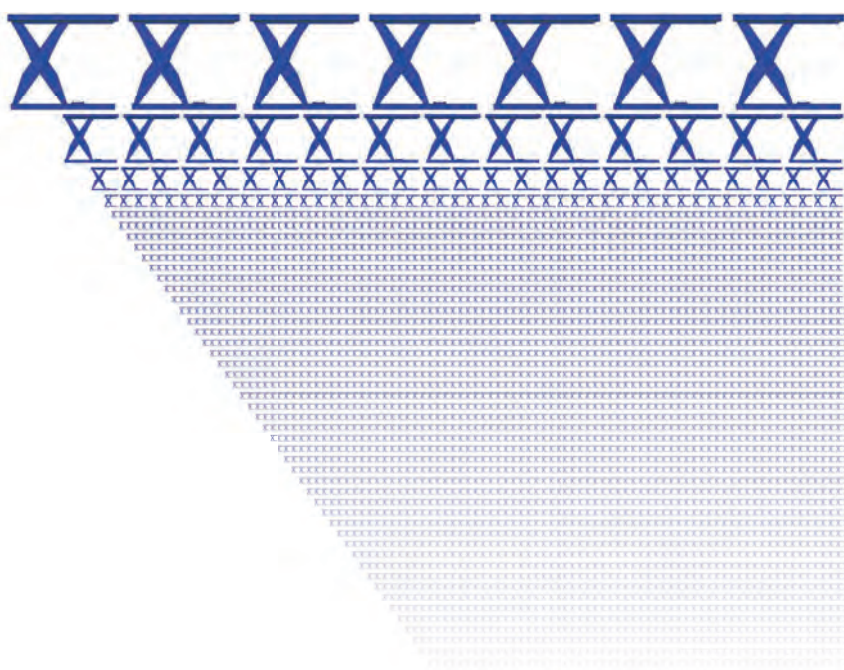

Safetech have thousands of scissor lifts installed throughout Australia and an unchallenged reputation for quality and durability make our scissor lifts an easy choice for your business.

More Custom Lift Tables than any other Australian company

Our team of engineers has over 100 years experience creating quality lift table designs.

From 100 kgs to over 30,000 kgs capacity.
Small single scissor to 15 m travel, traversing decks, high cycle, extreme environments we've built it.

So you can depend on us.

Australian Design, Australian Strength

High-rise rooftop mounted Building Maintenance Unit Scissor Lift - FARRA

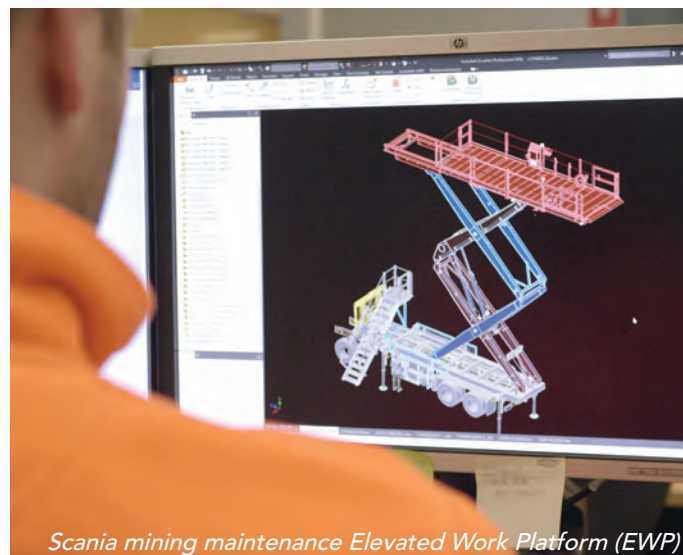

What Makes a Safetech Lift Table Better?

Our optimized scissor profile creates a scissor lift to match your specific needs. Safetech expertise in scissor geometry ensures a robust, reliable scissor engineered for your application.

We consider your duty cycle, the work environment, loading pattern, safety concerns and any other special requirements.

- 🔧 Australian designed and manufactured
- 🔧 A sales team that understands your needs
- 🔧 Engineered for safety and reliability
- 🔧 Comprehensive features and options
- 🔧 National 24/7 support

No other company comes close to matching our range or experience.

Scissor Designs

Many factors impact scissor design – vertical travel, deck size, compressed height and more.

Our sales team is trained to help you make the best choice of scissor.

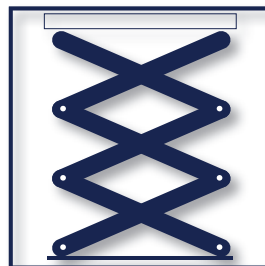

Each scissor is designed using our proprietary calculators to ensure optimised scissor geometry.

Careful consideration is given to the materials, sections used and cylinder sizing to ensure it equals the required lift to stroke ratio. Speed requirements also influence the motor specifications.

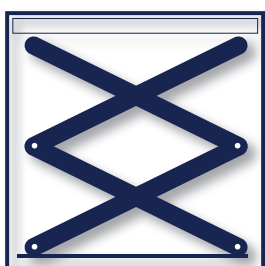

Single Scissors

Low travel distances, wide range of capacities and features.

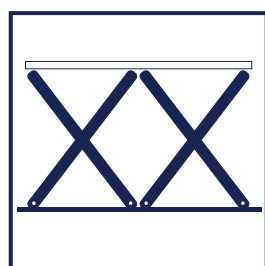

Triple Scissors

For applications with high travel and confined foot prints.

Double Scissors

An alternative for higher travel distances or where shorter platform length is required.

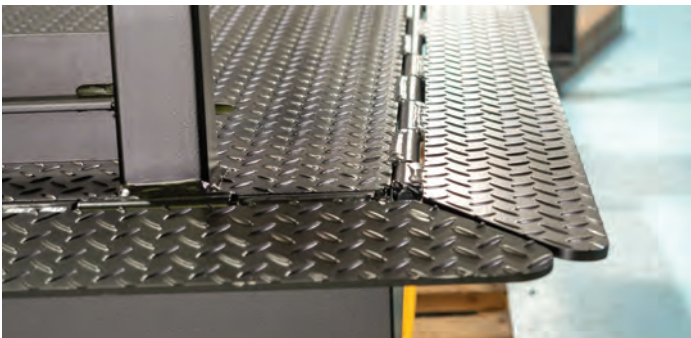

Tandem Scissors

Tandem scissor lift tables provide increased capacity and large platform sizes for a low compressed height.

Safety

Retail Dock Hoist with handrails and skirt

Descent Protection

Safety Bar standard on all Safetech lift tables.
Skirts can be added to enclose the platform.
Hinged flaps are used to bridge gaps around the lift table.

Maintenance chocks

Essential protection for service and maintenance.

Finishes

Paint finishes include 2pack epoxy, enamel and powder coat. Combine with integrated non-slip grit.

Stainless steel platforms for food and clean zones.

Personnel Lifting

Incorporating handrails, gates, safety interlocking and on-board controls.

Workstation Tables

Pharmaceutical distribution facility

End of Line Palletising

Scissor lifts are tough and proven in thousands of applications around the world. They are commonly used to increase the productivity and safety of palletising, machine feeding, work positioning, assembly, order picking and many other applications.

Pharmaceutical distribution facility

Safetech can customise your lift table to maximise the efficiency of your workstation.

Options include:

- Custom platform and base sizes
- Conveyor transfer decks
- Pit mounting
- Upper or lower travel limits
- Single touch indexing
- 3 phase or single phase
- A range of surface finishes including wash down

ASX-900 with Palring

Rotating platforms

Increase safety and ease of access.

Roof mounted retractable BMU Scissor - FARRA

Control integration

Electrically integrated control solutions that interact with surrounding equipment and conditions.

Automation

Automated distribution facility

Automated Systems Scissor Lifts

In-line automated systems often require integrated product lifting. Safetech regularly partners with leading automation companies to develop custom scissor lift solutions for cost-effective, high-performance palletising and depalletising systems.

Our products are trusted to provide high performance, flexibility, and reliability.

Applications include pallet feed station, food packaging, in-line board feed systems or high through-put warehousing.

Safetech super high cycle lift tables

Custom designed scissor lift with greaseable pivots and replaceable high wear components for applications that demand longevity, reliability and ease of maintenance.

Greaseable Roller followers and Bisalloy 80 roller paths upper & lower.

Cylinder hinge ends Include greaseable pivots.

Bolt on hinge blocks upper and lower.

Replaceable centre boss.

Loading Docks

Large Retail Dock Hoist with bollards and load flap

Australia's largest range of Dock Lifts and Hoists

Standard Dock Hoist

The reliable workhorse of Australian retail stores.

Typically configured with a hydraulic load lip for truck loading to configurations including flat, recessed or elevated docks.

Repco Byford WA

LoLift Pitless Hoist

No pit required. 40mm low height allows easy roll on roll off.

Lolift is ideal for tenanted facilities, layout flexibility, suspended slabs and avoiding expensive civil works.

Chadstone SC VIC

Heavy Capacity Personnel Dock Hoists

For loads up to 10 tonne Dock Hoists can be equipped with booth linings, onboard controls, load lips and personnel modifications.

Used on sites with large volume loads and a need to move personnel with freight.

Supermarket Dock Hoist

Choosing The Right Lift Table

Ask yourself these simple questions

Work with our expert team of Product Specialists and Engineers to design the perfect lift table for your business.

Some things to consider before implementing your Safetech Lift Table.

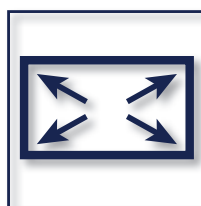

What is the application?

This includes considering the frequency of operation, load height and density, exposure to wet or corrosive environments, clean room requirements.

How heavy is the load?

This will effect the amount of steel used or type of power unit.

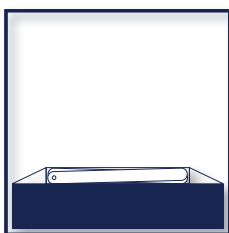

Is the load evenly distributed?

Or does localised off-centre loading occur?

Installation Options

Floor Mounted Scissors

Our low profile designs provide for easy roll on roll off access.

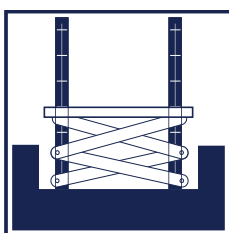

Pit Mounted Scissors

Pit mounted scissor lifts allow flush to floor or below floor lowered heights.

Guided Scissors

Guide Rails assist very heavy capacity scissors and through floor applications by reducing sway and platform contortion.

Pharmaceutical distribution facility

Possibilities

Scania Mining EWP with Traversing Platform

Mobile base with trolley handle

Platforms

- Custom sizes
- Traversing platforms
- Handrails and safety devices
- 100's of add-ons available

Bases

- Mobile castor design
- Elevated bases
- Vehicle or track mounted
- Fork socket mobility

Ingress Protection (IP) rated control panel enclosure

Stainless Steel skin for confectionery company

Controls

- Handheld, foot pedals or plug in control units
- Wall, handrail or landing mounted controls
- Latching or constant pressure
- Integration with controls by others

Finishes

- Enamel in standard or custom colours
- Sandblast and 2 pack polyurethane finish
- Food grade stainless steel
- Galvanised

Other Applications

Food & Pharmaceuticals

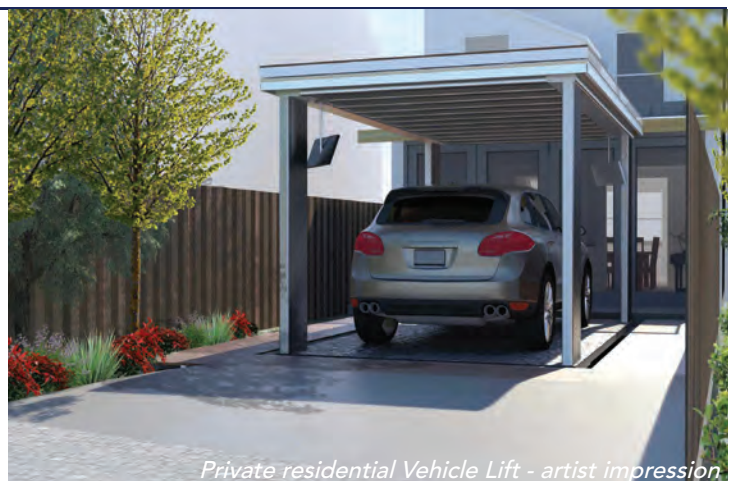

- ❖ Duty cycle specific
- ❖ Power units for constant operation
- ❖ Wipe down stainless steel platform and bases
- ❖ Scissor pivot & roller design for high life-cycle
- ❖ Food grade oil
- ❖ Load scales

Stainless Steel skin for confectionery company

Vehicle Lifts

- ❖ Standardised Australian design
- ❖ A single trusted supplier
- ❖ Safety & security
- ❖ Performance & reliability
- ❖ Quality finishes
- ❖ User experience
- ❖ Local support & service

Private residential Vehicle Lift - artist impression

Mobile Elevated Work Platform

- ❖ Mounting to various vehicles, including 4WDs, heavy rigid trucks and specialised mining vehicles
- ❖ Used widely in underground mining operations and pipeline maintenance
- ❖ Rail track mountings available
- ❖ AS1418.10 design registered

Underground mining maintenance scissor(vehicle by others)

Safetech Customer Care

Scheduled servicing agreements for peace of mind

Safetech provides comprehensive and expert support for all of its products.

Our team keep all Lift Tables running at their optimum level.

We also offer remote monitoring for real-time diagnostics and overall performance checking.

- ✓ Safetech will track & schedule when your equipment is due for service
- ✓ A full service history ensures correct diagnosis and management of your product
- ✓ Receive priority attendance to any breakdowns / call outs
- ✓ Receive a 10% Discount on the total of any invoice for a breakdown / call out attendance
- ✓ Intervals to match your usage
