Cleaning Comparison

PRE-WET WIPES V WASH & DRY

1. Browne Test Soil was applied to the vinyl arm rest of a chair.
2. The contamination on the left was cleaned using a pre-wet wipe.
3. The contamination on the right was cleaned by firstly applying **PureDet** to soften & suspend bio-soil, followed by drying clean with **Mediclean**.

Note residual bio-soil & moisture after cleaning with pre-wet wipe

Clean & dry using **PureDet** & **Mediclean**

Pre-wet wipes leave the surface with a damp film of diluted contamination.

Surface Moisture = Surface Contamination

PureDet/Mediclean combination leaves the surface clean & dry

Wipe Dry = Wipe Clean
