

# BUN/HAMBURGER SLICER

The Bun/Hamburger Slicer is engineered with precision cutting technology, ensuring accurate and consistent slices for hamburger buns, French bread, bagels, and similar slightly hard bread varieties.

The slicer is equipped with adjustable settings to tailor the slicing thickness according to specific requirements, providing customisation options for different roll and bun types. It also offers high-speed and consistent slicing capabilities, catering to the demands of high-volume operations.

The machine features a compact and efficient tabletop design, making it ideal where space efficiency is crucial

## For slightly hard bread

### Features

- Cutting precision
- Versatile
- Simple operation
- Adjustable depth and thickness
- High-speed and consistent slicing
- Smooth and durable German-made cutting blade
- Tabletop design
- Durable construction

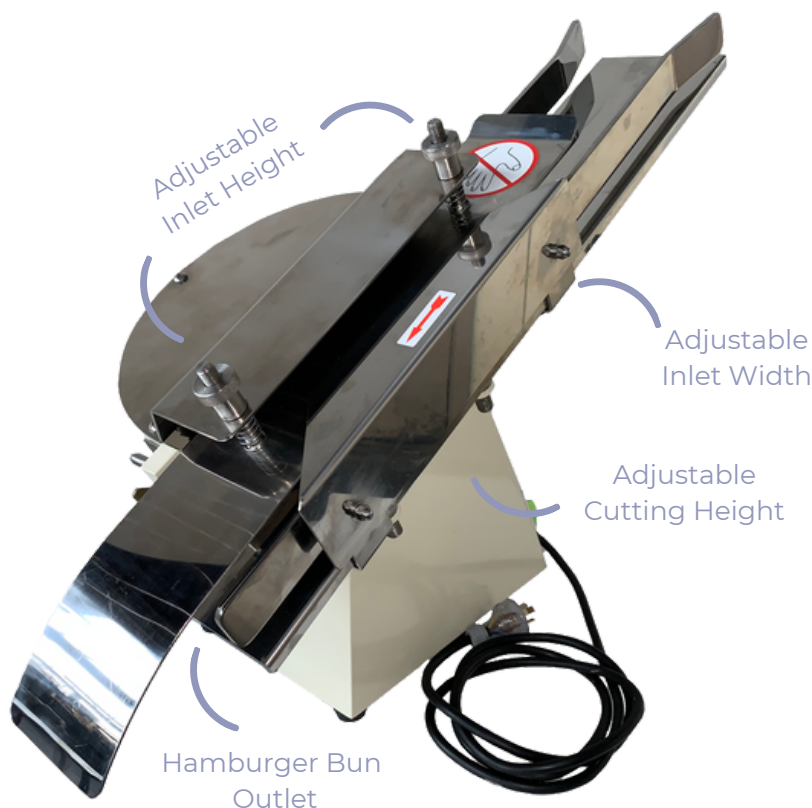

### Cutting Range

- Diameter - Ø 105
- Height - 50mm
- Length - no limit

### Specifications

- Single phase, 50/60 Hz
- 0.57kW

Part No	Height (mm)	Width (mm)	Length (mm)
CMSL30	600	670	360
