

Contour Multi-X

Custom trauma trolley designed and built to work in any emergency system.

Key Benefits

Smooth and steady: An advanced E-Point steering system and solid, perfectly centred steer wheel ensure the stretcher accurately tracks and turns, while maintaining a strong grip with the floor.

Effortless control: Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Longest warranty: Peace of mind with a lifetime of local support, easy maintenance, and fast guaranteed parts.

Application

Ideal for ED & Imaging.

Why Buy?

This emergency trolley features our unique InfineX tracking which allows totally unobstructed head to toe clearance for effortless and efficient X-Ray cassette positioning. We can help you get the most out of your expensive x-ray systems by building to suit the brand and equipment in use.

Tailor make the Contour Multi-X with height range choices and shorter, longer, narrower or wider top sizes. Put safety first and select from a range of dropside styles to suit the department requirements. There is a high level of customisation possible on Modsel trauma stretchers with many accessory mounting options and solutions.

Contour Multi-X

Electric package

Standard powered stretcher with package option.

Hydraulic option

Non-powered, manually operated stretcher option.

In some cases, such as small or remote facilities, or large high pressure departments, hydraulically operated trolleys may be more beneficial, with simple mechanical servicing and without the requirement of regular charging or power cords.

Electric standard

Standard powered stretcher in base configuration.

Sit and position your patient comfortably and then raise them to the desired work height with ease.

Ultra-low height

Very safe and easy for patients to get on and off. The 400mm low platform height of this table takes away the requirement to use step stools or unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Excellent high height

Preserve your back and raise a patient up to your best working height. Lifting the platform height up to 830mm (plus an extra 100mm for the mattress pad thickness), helps you to examine and treat your patient without having to stoop over, ensuring easy access and less stress. The backrest travels from 0 to 85 degrees with emergency CPR quick release.

Head and foot tilt

A generous 15 degrees top tilt both directions. Position a patient how you need them or quickly lower their head down (and feet up) in an emergency.

Easy customisation

Increase top width, change colours, mattress and dropside styles. Whether it is a specialised medical clinic or a department in a large hospital, every single customer has their own unique requirements to be able to function safely and efficiently. This stretcher has a longer, 7 riser PVC upgrade dropside.
