

HIPRO

HIGH INTENSITY FOCUSED ULTRASONIC

HIPRO-S TECHNICAL SPECIFICATIONS	
Energy Type	HIFU (High Intensity Focused Ultrasound)
Energy Output	0.1 - 2.0J
Electrical	AC 100-230V, 50/60Hz
Interval	1.0 - 2.0mm
Shot Length	30mm (full length), 15mm (half length)
Cartridge A (1.5mm)	10,000 shots
Cartridge B (3.0mm)	10,000 shots
Cartridge C (4.5mm)	10,000 shots
Cartridge D (8mm)	10,000 shots
Cartridge E (13mm)	10,000 shots
Dimensions	350 x 410 x 270mm (W x D x H)
Weight	10kg

HIPRO

HIGH INTENSITY FOCUSED ULTRASONIC

What is HIPRO-S?

HIPRO-S delivers HIFU energy to SMAS layer (located between subcutaneous tissues and muscle) and, makes TCP (Thermal Coagulation Points) zone without damaging the skin's surface, the HIFU energy can stimulate the collagen to be remodelled for skin tightening.

It has five types of cartridges 1.5mm, 3mm, 4.5mm as standards plus optional body cartridges 8mm and 13mm. It is a single liner Korean technology and cartridges last up to 10,000 lines very similar device to well known very first popular medical ULTHERAPY.

Characteristics of HIPRO-S

- HIPRO-S is a 93/42/EEC, CE and KFDA certified medical device.
- TGA ARTG 329238 listed for total face lifting, eyebrow lifting skin tightening and body slimming.
- Five types of cartridge; 1.5mm, 3.0mm, 4.5mm, 8.0mm and 13.0mm
- The shortest treatment time by continuous mode
- Reasonable price of consumables
- Less pain than other HIFU devices

Treatments areas for HIPRO-S lifting and tightening

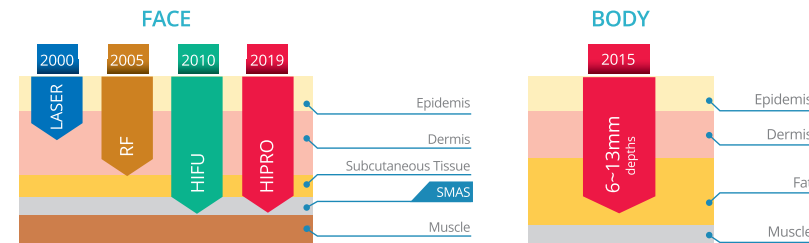

- Forehead wrinkles
- Nasolabial folds
- Wrinkles around the eyes
- Neck wrinkles

- Abdomen
- Arms
- Thighs
- Back
- Love handles

History of Skin Lifting

HIFU technology is not like lasers, radio frequency, super and other technologies. The HIFU (High Intensity Focused Ultrasound) steer around the surface of the skin to deliver the precise and fractional of ultrasound energy. The energy stimulates the new collagen to reproduce, which rejuvenates the skin leading to a more youthful and brighter contouring. It is especially suitable for treating sagging skin with reasonable thickness.

HIFU is the facelift you have without surgery – that means no downtime, no needles – and nobody will ever know! Results produce a tighter, brighter, firmer and more lifted face and/or body in just 60-90 minutes. And, better still, the results continue to improve over the next six months!
