OFFICE TRAILER

A mobile office/lunchroom trailer with an optional toilet

Overview

- Stylish office and lunchroom area for 4 - 12 people
- Optional toilet; choose between 4 different types
- Optional kitchenette and tool room
- XPS insulation, ventilation and LED lighting
- Highest quality and protection against corrosion
- Quick to set up, clean and maintain

■ FACILITIES

The office trailer is a simple and practical solution when there is a need for a work or dining area away from the office. It is available in three standard sizes suitable for 4 to 10 people or 6 to 12 without toilet. The trailer has a fixed table, chairs and power sockets. The window has a top-hung shutter that acts as a sun screen and additional protection when the trailer is not in use..

The trailer has a modern design, which gives the user a feeling of more space, cleanliness and comfort. It uses LED lighting for a pleasant white and energy-friendly light. The trailer is insulated with XPS foam and has ventilation, which make it comfortable to stay in all year round.

OUTSTANDING BUILD QUALITY

SINGLE PIECE CAST ROOF

All Scanvogn's units are supplied with a fully cast roof. This ensures a tight carriage in all weather conditions and significantly increases the service life. The roof is cast with an even curvature for optimal strength and water drainage. The roof has a gutter system which helps direct water and dirt away from doors and windows.

STRONG CONSTRUCTION

All external walls are cut out with a seam and positioned so that the angle closes down tightly around the floor. The corners are also cut out with a seam and assembled with strong anodized aluminum profiles. All in all, this results in a wagon with maximum strength and density, which ensures the highest quality.

EXCEPTIONAL PROTECTION

FULLY GALVANISED

Scanvogn allows only the highest standards in protection against corrosion. All our trailers are supplied with a strong hot-dip galvanized chassis. The galvanization is carried out only after the chassis has been mechanically machined, which means that all edges and bolt holes are also galvanized.

LONGER SERVICE LIFE

There are other products on the market where the galvanization is done before the mechanical processing, resulting in exposed edges and holes. This increases the chance of corrosion and results in a shorter service life. Scanvogn has examples of 25-year-old trailers without particular corrosion.

USE & EFFICIENCY

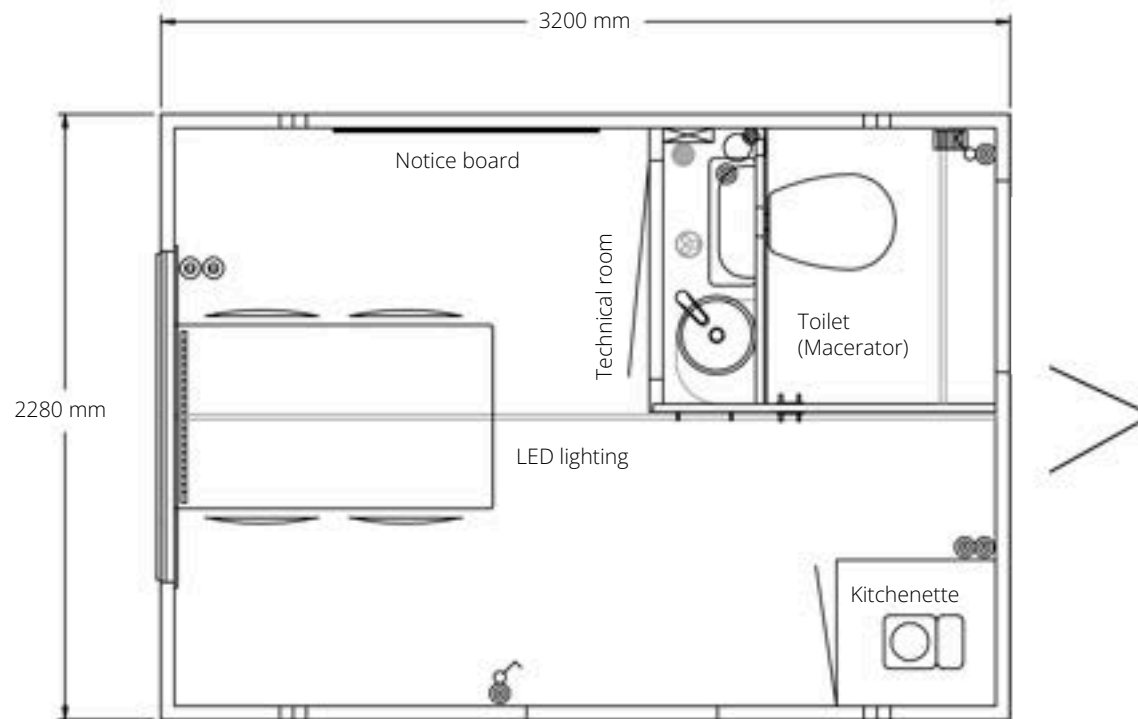

A FLEXIBLE OFFICE

The office trailer is one of our best-selling models and is on construction, civil and infrastructure sites all over Australia. It comes standard in 3 different sizes with the option one of our 4 toilet types. It is possible to upgrade the trailer with a kitchenette, air conditioning, toolroom and more!

EASY TO USE, QUICK TO CLEAN

The trailer is connected to a standard 50mm trailer hitch and can be set up and ready in a few minutes. This makes it possible to move the trailer from place to place quickly and efficiently without any hassle. The trolley is made of easy-to-clean and durable materials, which save time on cleaning and maintenance.

OFFICE TRAILER - 320

All measurements and weights are non-binding. Subject to change.

Ext: 3200 x 2280 x 2900 mm
Int: 3096 x 2176 x 2100 mm

■ OPTIONS

ADDITIONAL FEATURE

All our trailers can be delivered with various upgrades, which further increase the experience and functionality. The most popular upgrade for the office trailer is the tool room, mini kitchen and extra shelves. The tool room offers a secure, externally accessible storage area with internal shelving suitable for supplies.

TOILET SOLUTIONS

We offer four different toilet types based on comfort, design and efficiency. Most office trailers are supplied with a tank toilet. We offer two options for sewer connect, these are our standard flushing and macerator toilets. Lastly if water conservation is important, we recommend a vacuum toilet.

■ OPPORTUNITIES

One of the biggest advantages of a trailer from Scanvogn is the high degree of flexibility in the form of customized solutions. We produce the majority of all components ourselves and work closely with our suppliers to develop parts that optimize quality, design and functionality.

The result is that Scanvogn can offer a wide range of attractive configurations within sanitation, decontamination, residential, office and kitchen, which meet most of our customers' needs. We therefore always aim to involve customers in the drawing process in order to achieve the greatest satisfaction.

Scanvogn, for example, gives the customer the opportunity to choose between 4 different toilet solutions based on water consumption, decor and comfort. The solutions include water-flushing toilets with and without macerators, water-saving Jets Vacuum toilets, independent tank toilets and combustion toilets.

The majority of Scanvogn's trailers can be built to be fully or partially self-sufficient with water and sewage tanks, solar cells, batteries and gas. The capacity of water, electricity and gas can be adjusted as needed. Our smallest tank toilet, for example, has a capacity for 200 visits, while our toilet house can handle up to 1,500 visits before it needs to be emptied.

■ SCANVOGN

Scanvogn is Scandinavia's leading manufacturer of mobile solutions for the construction and event industry. Our core products consist of staff and residential vans, office and dining vans, toilet and bath vans as well as special solutions for emergency aid organizations that operate in remote areas where there are no adequate sanitary and residential facilities.

Scanvogn's most important characteristics are quality, flexibility and service. It is our vision to contribute positively to our customers' success by offering solutions that meet the demands for quality, comfort and safety of a modern society.

We are always helpful in uncovering and fulfilling the customer's needs, both during the sale and when the vehicle is with the customer. This is reflected in our customized solutions, as well as our ability to handle repairs and supply spare parts.

With over 20 years of development and innovation, Scanvogn has the experience and competence to transform our customers' ideas into functional solutions and deliver products of the highest quality.
