

INCREASED EFFICIENCY

At Toshiba, we want to help you be more efficient and streamline your workflows. With this in mind, we designed the e-STUDIO2518A and equipped it with all the features you need for modern document workflows.

Today's world requires successful businesses to have access to data and information even when on the move. The e-STUDIO2518A easily integrates into cloud and mobile workflows. Thanks to the advanced controller technology integration into third-party solutions is easier than ever.

Streamline your everyday tasks with ease through Toshiba's innovations in embedded app technologies and connect directly with popular cloud and on-premise platforms right at the panel.

Seamlessly connect with your business platforms

- > Find better ways of managing your compliance obligations
- > Introduce business efficiencies through simple workflows and automation
- > Handle hard copy documents with ease
- > Eliminate information security concerns with on-board direct-to-platform processing (no intermediate software or cloud services)

Security for your business

Toshiba is a leading provider of information technology and protecting data has always had utmost priority for us. So, of course, the e-STUDIO2518A comes with state-of-the-art security features, such as the self-encrypting Toshiba Secure HDD. By making full use of all the methods offered to protect personal data you can ensure that any information processed on the MFP is safe.

A COMPACT DESIGN WITH EVERYTHING INSIDE

You will be surprised how much functionality Toshiba has fitted into the small footprint of the e-STUDIO2518A. Designed to help you enhance your efficiency the system will let you do more in less time.

Mobile Printing gives you full flexibility and lets you easily connect to mobile devices via AirPrint, Google Cloud Print or the Mopria Print Service.

Wi-Fi Direct feature offers the possibility of on-demand connection. Add to this, the Toshiba e-BRIDGE Print & Capture app and you get even more flexibility, as it not only lets you print from but also scan to your mobile device.

Embedded Optical Character Recognition (OCR) simplifies the creation of searchable PDFs and editable document formats such as Microsoft Word.

Scan to USB is great for working with your documents when on the go. And with the possibility to create PDF/A-2 files your documents are ready for long-term archiving

Scan and Fax preview allows to review, rotate and modify your scanned documents or incoming faxes before saving or printing them.

Barcode printing gives you the possibility to send print data from your ERP system directly to the MFP. The barcode sequence is automatically processed and printed without the need of additional middleware.

Customisable User Interface for an all new user experience. A fully customisable, tiltable 26 cm (10.1") colour panel works like a tablet or smartphone interface so you can find whatever you need by just swiping your finger.

HIGHLIGHTS

Embedded apps

Each company has different ways of storing and sharing data. Therefore, the e-STUDIO2518A can be equipped with apps to enhance your efficiency. Whether you wish to connect to cloud services or local applications, we have the solution.

Multi Station Print Solution

Toshiba's server-less Multi Station Print Solution allows users to send print jobs from their desktop and retrieve them at up to 50 different MFPs within the network by authenticating at that device, e.g. by simply swiping their badge.

Dual Scan Document Feeder

An option which holds an amazing 300 originals and boasts an impressive 240 images per minute (ipm) by scanning both sides of the page in a single pass.
