

Product Accessories

Disposable Barrier Covers (Box of 30)

Used with coated Troop Elevation Pillows and Addition for infection control.

Ref #: 10-910-03

Maintain Infection Control with
Disposable Barrier Covers

Elevated Arm Board Pads - Coated (Box of 2)

Used to elevate the arms and cushion the arm boards. Comes with reusable straps that can easily be secured to arm boards.

Ref #: 10-910-07-C

Head Cradle - Coated (Box of 4)

Used to support the head.

Ref #: 10-910-02-C

Improve Airway Management for Obese/OSA Patients

Troop Elevation Pillow™ Anesthesia Positioning

The Troop Elevation Pillow (T.E.P.) quickly achieves H.E.L.P. (head elevated laryngoscopy position) to lower risk and improve patient safety.

- Aligns upper airway axes to facilitate successful 1st pass intubation
- Improves ease of breathing with better pre-oxygenation tension for obese patients
- Complements all methods of airway management (DL & VL, Glidescope, AirTraq etc.)
- Improves O.R. time efficiency

Head elevated laryngoscopy position (H.E.L.P), in which the head is visibly above the shoulders with horizontal alignment between the external auditory meatus and sternal notch. This improves the view during laryngoscopy compared to the sniffing position in obese patients.¹ Other benefits include better preoxygenation and easier bag-mask ventilation in obese patients.²

Indications for use: General and regional anesthesia for obese patients across numerous specialties: obstetrics, ENT, head and neck, maxillofacial, bariatric surgery, neurosurgery and X-ray/cath lab procedures.

1. Collins JS, Lemmens HJ, Brodsky JB, Brock-Utne JG, Levitan RM. Laryngoscopy and morbid obesity: a comparison of the sniff and ramped positions. *Obes Surg*2004;14:1171-5.2.

2. Dixon BJ, Dixon JB, Carden JR, et al. Preoxygenation is more effective in the 25 degrees head-up position than in the supine position in severely obese patients: a randomized controlled study. *Anesthesiology*2005;102:1110-5.

Airway Management Aid for Obese/OSA Patients

Easy to Use, Stable, & Yields a Predictable Result

Disposable Troop Elevation Pillow

Single use version is the preferred method for infection control, and the Disposable Barrier Cover is included. These can be used for intra-op and post-op patient care.

Troop Elevation Pillow - Disposable

Used for the majority of obese/morbidly obese patients up to approximately 450lbs. It includes the Troop Elevation Pillow only and must be used with a head cradle.

Box of 4 Troop Elevation Pillows
Ref #: 10-910-00

Disposable Head Cradle

Head cradles are sold separately. The Troop Elevation Pillow can be used with any standard head cradle.

Troop Elevation Pillow Addition - Disposable

The Addition is used with the Troop Elevation Pillow and Head Cradle for patients over 450lbs.

Box of 2 Additions
Ref# 10-910-04

Troop Elevation Pillow

The systems are coated with a medical grade vinyl coating and are reusable. For infection control, the Elevation Pillow & Addition must be used with a Disposable Barrier Cover. Failure to use the barrier cover will void the warranty.

Our most complete Anesthesia positioning system that includes components to accommodate both morbidly obese patients up to 450 lbs and super morbidly obese patients who are over 450 lbs. This system must be used with the Disposable Barrier Covers.

Anesthesia positioning system that includes components to accommodate obese patients up to 450 lbs. This system must be used with the Disposable Barrier Covers.

Bad Airway Positioning

PATIENT: 6'0" - 375LBS.

Airway axes are misaligned on the head cradle only.

Good Airway Positioning

PATIENT: 6'0" - 375LBS.

On the Troop Elevation Pillow and a head cradle the airway axes are beginning to align.
