Variety of curtain
application styles

Efficient loading/
unloading

A 'curtainsider' truck is a generic name for a truck or a trailer with a curtain as the side. The curtain is made of a polymer material and fitted with rollers at the top. The curtain is secured by straps, buckles, or hooks, and it can be pulled to either end of the body for access to the inside of the body. Curtainsider bodies can be used to transport all different types of palletised and unpalletised freight which are not subject to specific temperature controls.
