

BE READY FOR AN EMERGENCY

A fire extinguisher must always be ready in an emergency.

It will be charged, accessible and well signed.

It will also be the correct type for the potential fire.

It will also be checked by a competent person and must be ready to go at all times...!

An Environmental Spill Response Kit must always be ready in an emergency.

It will be stocked, accessible and well signed.

It will also be the correct type for the potential spill, i.e. oil, chemical

It will also be checked by a competent person and must be ready to go at all times...!

Does your site have documentation available to ensure your Environmental Spill Response Equipment is maintained and complies with Work Health Safety (WHS) Regulations, Environment Protection (EP) Legislation and Codes of Practice (COP)?

Don't leave yourself open to a potential environmental spill and not be prepared. This can be prevented with the help of a well-structured maintenance service program, coupled with on-site spill response training
