

3 in every 4 senior dogs have heart disease

The most common heart diseases are dilated cardiomyopathy and mitral regurgitation.

15% of cats have heart disease

The most common heart disease is hypertrophic cardiomyopathy.

Arrhythmias and Atrial Fibrillations (Afib) are common in dogs and cats. You need an ECG for screening and diagnosis of heart disease in pets.

Medical Grade Diagnostic 12-lead ECG for Veterinary Care

- Full 12-lead ECG for dogs and cats of different sizes
- Easy to use sensor patch replaces standard electrodes
