

Aquatuff Bari

A robust, fully electric 300kg SWL shower trolley with extra wide base and top for Bariatric patients.

Key Benefits

Safe & secure: The dropsides fold underneath the top and the liner side lays down to provide gap free patient transfers.

Hygiene conscious: Tilt the top 2 degrees and lower the drain hose tip to quickly remove waste water.

Custom adjustments: Raise your patient to a comfort position with a 15 degree electric backrest option available.

Why Buy?

Having equipment that is robust and completely reliable is of the utmost importance when caring for larger or heavier patients. We have over-engineered the componentry strength in this design and our decision to use total stainless steel reinforces the lifetime value that this bariatric shower trolley will give. The electric operation helps to safely lift 300kg without overload, whilst four twin wheels with brakes with wider base and top all increasing versatility in special needs.
