

## Product Information Sheet

# Absorb's Portable Collapsible Bunds

Absorb Portable Collapsible bunds are another popular type of bunding on the market, sold under a variety of names. Absorb Environmental Solutions portable collapsible bunds are engineered to be more rigid than most on the market, with the arms on the outside of the bund both for extra stability and to afford more working room inside the bund where space is of the utmost importance.

Any of the Absorb Portable Collapsible Bunds provide spill containment in applications where hydrocarbons or potentially hazardous chemicals/liquids are stored. Durable, portable and easily erected, portable bunds are designed for traffic or to bund a truck. They are made from fabrics that offer differing levels of chemical and puncture resistance. Easily folded and stored.

### Features

- Flexible side walls for delivery of liquid storage drums.
- Easy to store
- Chemically resistant & UV stable polymer coated fabric.
