

Inogen® Rove 6

Portable Oxygen Concentrator

The Inogen G6 Rove 6 Portable Oxygen Concentrator (POC) offers 6 flow settings, making it one of the most **powerful, lightweight, and quietest** options on the market. The Rove 6's compact design weighs just **2.2 kg** (with a single battery) and is very quiet, even quieter than an average library (on flow setting 2). The Rove 6 stands out for its exceptional battery life. Lasting up to **6 hours** on an 8-cell battery and **13 hours** on a 16-cell battery.

Clear Display

With just a glance, the user can see the flow rate, battery percentage, and any alerts on the Inogen Rove 6. The numerous alerts enable easy device diagnosis and can be silenced while still being accessible for viewing at any time.

FAA Approved

The Inogen Rove 6 is FAA approved. Cleared to fly domestically or internationally.

Weights Only **2.2kg** and Measures Only **20.7H x 18.26L x 8.28W cm**

Can Produce up to **1260ml** of Oxygen Per Minute

6 Flow Settings

Exceptional Battery Run Time: Up to **13 Hours**

Travel Friendly & Swappable Batteries

The Inogen Rove 6 weighing only 2.2 - 2.6kg (depending on battery), can be carried on your shoulder with the carry bag or the optional backpack.

Exceptional Battery Run Time & Portability

The Rove 6 lasts for up to 6 hours on an 8 cell battery and up to 13 hours on an 16-cell battery.

These batteries are small enough to fit into most bags, making it very portable. When one battery goes flat, simply swap it with another charged battery on-the-go.
