About

- + Kerfab's range of Wheel Loader GP Buckets are one of our most popular products - we are experts in advising on, designing, and fabricating GP buckets.
- + A GP bucket is ideal as an all round bucket and is designed to handle loose material and aggregate
- + Kerfab's standard line of GP Buckets are available for machines up to 15T (custom sizes available)
- + A GP bucket is often used to handle gravel, fertiliser, rubble, light materials, dry sand, and other materials under 1600kg/m³
- + Our range of buckets can come fitted with teeth, bolt on edges, or weld on edges - Kerfab can advise on what is best for your application
- + Multiple options can be fitted to a GP bucket to improve it's suitability for different applications, these include wear plates, internal liners, trash guards, and internal

- coatings. Kerfab can advise on what's best for your applications
- + Kerfab's range of Buckets are available in a range of widths, capacities, and machine sizes. Below is a list of our most popular sizes.

Custom Solutions Available
