ELECTROLYTES POWER YOUR BODY'S NATURAL PROCESSES

Sqwincher® has served Australasian workers since 1999 and is trusted by many leading companies, fire, emergency services & defence force organisations to provide safe & effective hydration to their workers.

IT COSTS LESS TO PREVENT A HEAT RELATED ACCIDENT
OR ILLNESS THAN IT DOES TO RECOVER FROM ONE.

SQWINCHER[®] VS

SUGARS	0 g	0.07 G	15 G	34 G
CALORIES	0 cal	3 CAL	60 CAL	150 CAL

Based on a serving size of 600ml

THE FACTS

Sqwincer[®] has the lowest amount of sodium per 600ml vs the rest

To reduce blood pressure and lower the risk of heart disease, the Heart Foundation recommends adults eat less than 5g of salt (2000mg of sodium) a day. That's less than a teaspoon a day.

Sqwincer[®] has a superior balance of potassium

Potassium is a vital electrolyte in the human body necessary for muscle contraction, carbohydrate metabolism, fluid balance, cognition and heart function in preventing high blood pressure. Recommended daily intake of potassium for an adult is about 4700mh per day.

Sqwincer[®] is available in the widest range of consumer packaging designed specifically for the workplace

These include portion controlled packets that eliminate product wastage/ overuse and are available in 3 different forms; powdered, liquid concentrate, frozen, and include both regular and sugar-free options.

Sqwincer scores highest for taste and palatability

Research shows that increasing the palatability of water helps increase fluid intake and aids hydration.

Low cost per serve

Sports and pharmacy electrolytes are significantly more expensive per serve than Sqwincer.

Sqwincer[®] has served Australasian workers since 1999 & is the leading industrial hydration drink.

It costs less to prevent a heat related accident or illness than it does to recover from one. Keep your workers hydrated with Sqwincer[®].
