

YOUR SOURCE FOR FORCE

MSA MAGNETIC FORKLIFT SWEEPER

The ideal solution for safe, fast, and easy collection of swarf!

Magnetic swarf is a problem that most of us experience. Not only is it a mess on your factory floor, but it can also cause a lot of harm. Objects can get into product lines, puncture tyres, and even injure personnel. MSA provides a large range of magnetic broom solutions - from light brooms for general use to heavy duty sweepers for large-scale operations.

MAGNETIC FORKLIFT SWEEPERS

For the ultimate protection of tyres from punctures!

MSA Magnetic Forklift Sweepers are powerful, permanent magnets ideal for the removal of sharp iron objects from roads, parking areas, loading docks, and other important traffic areas – greatly reducing the risks of costly damage to tyres and injuries caused by nails, scrap iron particles, staples, etc.

- Sizes include 36", 48", 60", and 72"
- Recommended sweeping height: 2 inches
- Max. recommended operating speed: 8km/h

To remove collected fragments, simply pull the handle on the top of the sweeper and metal fragments will drop off.
