

ADVANCED TECHNOLOGY IN NON-CONTACT VOLTAGE DETECTION

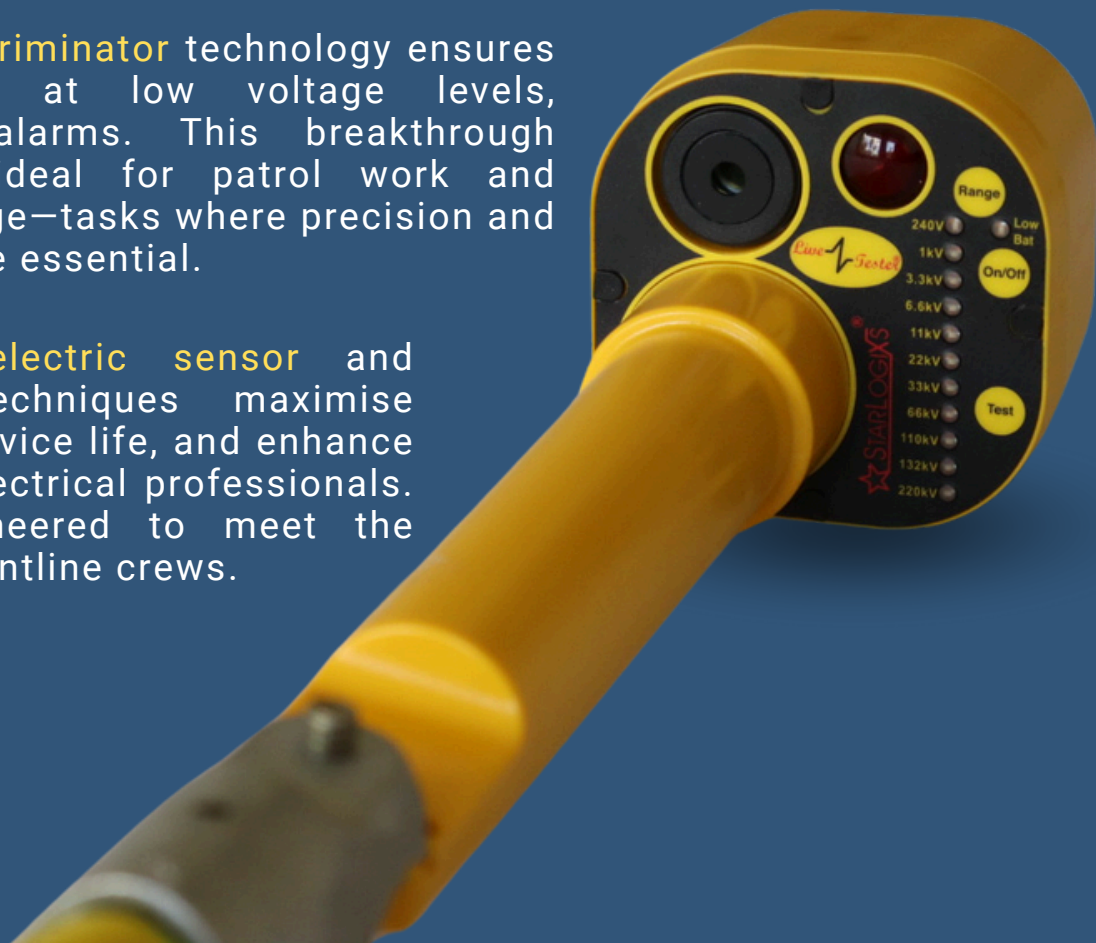

**TRUSTED BY PROFESSIONALS,
ENGINEERED FOR SAFETY**

MODEL: LT220 LIVETESTER

LiveTester is a next-generation non-contact voltage detector, featuring an innovative design developed by StarLogixs using advanced electronic circuitry. Built for today's demanding field environments, it delivers dependable performance with cutting-edge technology.

Exclusive **Static Discriminator** technology ensures accurate detection at low voltage levels, eliminating false alarms. This breakthrough makes LiveTester ideal for patrol work and detecting pole leakage—tasks where precision and trust in your tools are essential.

A patented **ferro-electric sensor** and modern design techniques maximise reliability, extend service life, and enhance safety for today's electrical professionals. LiveTester is engineered to meet the evolving needs of frontline crews.

100% AUSTRALIAN DESIGNED & MANUFACTURED

WHAT MAKES LIVETESTER UNIQUE?

STATIC DISCRIMINATOR

SELF-TEST FUNCTION

LOW BATTERY INDICATOR

UNIVERSAL ATTACHMENT

LOUD AUDIBLE ALERTS

BRIGHT VISUAL INDICATORS

LiveTester is packed with innovative features designed to enhance safety, reliability, and ease of use in the field. Each detail has been engineered to meet the demands of real-world high voltage detection.
