# Surgery Chairs

Chairs that provide the best  
conditions for precision work

**CE** ISO 9001  
ISO 14001

Danish design and production since 1935

# VELA 'Support+' Surgical Chair

LOW BACKREST SUPPORTS THE LOWER BACK AND ALLOWS FREE MOVEMENT OF THE SHOULDERS AND ARMS

MULTI-ADJUSTABLE ARM SUPPORT RELIEVE STRAIN ON ARMS, SHOULDERS AND NECK

FOOT-OPERATED ELECTRICAL HEIGHT ADJUSTMENT ENSURES EASY AND CORRECT POSITIONING RELATIVE TO THE PATIENT

EASY-TO-LOCK WHEELS ALLOW THE CHAIR TO BE MOVED AROUND AND BRAKED

FOLDAWAY FOOTREST PROVIDES INCREASED STABILITY IN HIGH WORKING POSITIONS

Item no. 80115

The VELA 'Support+' Surgical Chair can be adjusted to suit each individual surgeon and provide the optimal position for carrying out lengthy precision work.

- :: Multi-adjustable arm support can be locked in the desired working position to suit the type of operation
- :: Arm support help **keep arms and hands stable** while working, and relieve strain on the back, shoulders and neck
- :: Chair height can be fine-tuned relative to the patient using the foot-operated electric adjustment, which preserves **hand sterility**
- :: Compact chair with unique designed base allows surgeons to **get extra close to the bed** and provides **plenty of space for their feet**
- :: Gliding wheels provide surgeons with easy movement during surgery and wheels can be locked and unlocked by foot
- :: Low backrest **supports the lower back** and allows **free movement of shoulders and arms**

# VELA 'Basic+' Surgical Chair

Item no. 80114

The VELA 'Basic+' Surgical Chair can be adjusted to suit each individual surgeon and provide a comfortable working position.

- :: Chair height can be fine-tuned relative to the patient using the foot-operated electric adjustment, which preserves **hand sterility**
- :: Compact chair with an unique designed base allows surgeons to **get extra close to the bed** and provides **plenty of space for their feet**
- :: Gliding wheels provide surgeons with easy movement during surgery and wheels can be locked and unlocked by foot
- :: Low backrest **supports the lower back** and allows **free movement of shoulders and arms**
- :: Chair is **easily adjusted** (even by **assistant staff**) as necessary during lengthy procedures
- :: This chair is optimal for operations where armrests are not required

LOW BACKREST SUPPORTS THE LOWER BACK AND ALLOWS FREE MOVEMENT OF THE SHOULDERS AND ARMS

HEIGHT ADJUSTMENT BY FOOT DOES NOT COMPROMISE STERILITY

FOLDADWAY FOOTREST PROVIDES INCREASED STABILITY IN HIGH WORKING POSITIONS

ELECTRICAL HEIGHT ADJUSTMENT ENSURES EASY AND CORRECT POSITIONING RELATIVE TO THE PATIENT

EASY-TO-LOCK WHEELS ALLOW THE CHAIR TO BE MOVED AROUND AND BRAKED

# Staff chairs for examinations

VELA Samba 150

Item no. 80143

## VELA Samba 150

- :: Extra short seat with a tilt allows **close access to the bed** while avoiding a bent-over working position
- :: Adjustable backrest **supports an active sitting position** and provides free movement of shoulders and arms
- :: Seat **relieves pressure on the seat bones** and increases comfort using different foam types and a **pressure relief zone** in the centre of the seat
- :: Ergonomic design and rounded seat edge enables staff to **sit for long periods in the same position** while maintaining **good blood circulation** in the legs

VELA Samba 110

Item no. 80141

VELA Samba 120

Item no. 80142

## VELA Samba Standing Support Chairs

The only difference between the two models is the seat:

*VELA Samba 110 has a rounded front edge with a cap that provides good stability in a standing position*

*VELA Samba 120 has a 'bicycle seat' cut-out at the front that makes it easy to move around while sitting*

- :: **Ideal for frequent changes between standing and sitting work**
- :: **Relieves stress in the back and lumbar area** when standing or changing work postures
- :: Extra short seat allows **close access to the bed** while **avoiding a bent-over working position**
- :: Ergonomic, adjustable backrest **supports an active sitting position** and provides free movement of shoulders and arms

# Stools

## VELA Samba 520

- :: Small and compact stool **ideal for shorter, sedentary work**
- :: Adjustable ergonomic backrest promotes an **active seating position** and **allows the shoulders and arms to move freely**
- :: Compact design makes it **easy to move** around while sitting
- :: Seat height is easily adjustable

## VELA Samba 500

- :: Compact stool without backrest, easy to store under a table when not being used

## VELA Samba 420

- :: Saddle seat stool with narrow, adjustable backrest provides ergonomic **seating positions** for all sedentary work
- :: Provides seated mobility while performing different tasks
- :: Saddle seat with a tilt gives an open hip angle and promotes an **active, erect seating position**
- :: **Compact design** makes it possible to sit **very close to the equipment, device or patient**

## VELA Samba 400

- :: Stool with saddle seat **promotes a good working position to prevent stooping posture**

*All chairs and stools are available with different types of wheels and a foot-operated height adjustment*

## Hygiene Benefits

VELA medical chairs are designed to meet the stringent hygiene and disinfecting requirements in the healthcare sector

- :: For optimal hygiene, chairs have easy-to-clean surfaces without recesses where dirt might gather, including the underside of the chair
- :: All backrests are supplied with edge bands to prevent dirt collecting in the joints
- :: The chairs have easily cleanable surfaces without any recesses, where dirt might gather
- :: All parts can withstand disinfection, for example, with alcohol or chlorine at the recommended concentration and mixing ratios
- :: Light-coloured surfaces make it easy to spot marks when cleaning

Distributor Details:

## Danish Quality

VELA is a Danish family-owned company founded in 1935 by Verrmund Larsen. VELA is headquartered in Aalborg, Denmark and has its own development department, and production and padding workshop. In order to be close to our customers, we have a strong, international dealer network.

### CHAIRS DESIGNED WITH CARE AND PRECISION

The development department at VELA is constantly focused on optimising safety, functionality and ergonomics in cooperation with health professionals.

We take into consideration that chairs in the healthcare sector are exposed to severe wear and tear for many hours each day. At VELA, we use hard-wearing mechanical parts and extra-durable seating materials to keep the chairs clean and functional for many years. All VELA chairs are CE marked and made in Denmark.
