

**Gas Bottle Clamp Grab Attachment with Self Contained Hydraulics
EW-GBCP**

The EW-GBCP Gas Cylinder Grab Attachment with fitted Hydraulic Power Pack is designed to safely grab, lift and transport gas bottles of most sizes around the worksite. Its long arm design allows the operator to easily load and unload from a pallet or truck. This lifter can pick a single gas bottle from a pallet or gas cylinder bay without disturbing the others.

Features:

- Safely handles gas cylinders up to 160-380mm wide
- Operates independently from the forklift hydraulic system
- Long arm reach for ease in loading and unloading
- Replaceable bonded rubber clamp pads
- Slip-on attachment and safety chain allows quick connection to a forklift
- Excellent operator visibility
- Enamel paint finish

Hydraulic Power Pack Features:

- Remotely controlled pendant (50m distance range) with spare pendant supplied
- 12-Volt DC hydraulic pump
- Battery & battery charger
- Robust cabinet box protects all components
- Incorporated safety features include a two-button opening function and emergency stop
- 180 AMP main fuse protects the full electrical circuit whilst a secondary 10AMP fuse adds further protection to the remote system and solenoid coils
