[www.amco.net.au](http://www.amco.net.au)

- Reduce costs associated with Slips, Trips & Falls
- Walkways
- Access Points
- Stairs & ladders
- Inclines
- Conveyor Walkways

*Creating Great Days!*

# U-TRED PRO

**Smarter Science.  
Brighter Vision.**

Another anti-slip breakthrough! Amco's innovative Anti Slip Grate Cleats have changed the ball game yet again! UV Stabilised with extreme fire retardant ratings. No Nuts, bolts or fasteners required - Installs in seconds! In Higher Visibility green for low light conditions in and around industrial mining plants.

Used on Offshore Gas and Oil rigs, Mining Infrastructure, Drag Lines, Marine Infrastructure, Shipping Ports, Grain Handling Infrastructure, Wineries, Breweries, Paper Mills, Timber Mills and Commercial Buildings.

## PRODUCT DATA

Fire Retardant Rating: V-0

Melting Temperature:  
220 degrees C

Resistant to Petroleums: Diesel,  
Oil, Petrol, Heating Oils, Ethane,  
Ethanol and many more

Resistant to Chemicals: Ethyl  
Acetate, Ethyl Chloride, Glycols,  
Heptane, Lactic Acid, Lead  
Acetate, Methane, Ethanol,  
Methyl Acetate, Methyl Ethyl  
Ketone plus many more

## BENEFITS

- Non corrosive
- Can be used on Offshore Gas and Oil Rigs
- Very High Tensile & Impact Strength for extended wear life
- Metal replacement Composite
- No dissimilar metal electrolysis
- 100% colour saturation throughout
- Light weight - can be air freighted at minimal cost
- Green is higher visibility than yellow in high and low light conditions
- Extremely High-Fire Retardant rating
- Petroleum Resistant
- Chemical Resistant

## FEATURES

- Self-Cleaning rounded top bridge - Wet and dry debris slide off with ease
- Double Action - Aggressive small cleats penetrate the soles of boots saving workers from slipping and a potentially traumatic event
- UV Stabilised
- Higher Visibility Nano555 Green colour
- Double acting non return locks
- Patent No 2012202911
- Australian Design 12140/2020
- Canada Design 148172
- US Design App 29/435312
- US Design Patent USD782, 293 S

## Testimonials

"...they are fantastic...They install in about 5 seconds, and are maintenance free."

"I have just installed a sample of this product, which is a new Australian design, for open type grid steps used in manufacturing and oil and gas industries in Australia. I am currently trialling them on the stairs leading down to the blend pit area, and so far, they are fantastic and the blenders are very happy with them. They install in about 5 seconds, and are maintenance free. They don't appear to clog up like the standard non slip grit type products do."

**Neil Thomas**

Production Manager, Valvoline Australia Pty Ltd

# Improve safety while saving time & money

U-TRED is an Innovative new product that installs in seconds onto all open grid type steps used in the mining, construction and agricultural industries.

The U-TRED creates revolutionary step definition and features double action anti-slip cleats for that extra grip. With no nuts, bolts or fasteners of any kind, your steps are upgraded instantly.

U-TRED is a robust steel product, galvanised and powder coated safety yellow. It will not crack or release hazardous splinters inflicting bodily harm which can occur with fiberglass stair treads. Existing anti-slip products such as stair nosings can quickly become ineffective after clogging up. Try a U-TRED sample pack today. You will be amazed!

## Benefits

- Guaranteed to revolutionise your maintenance programme
- Galvanised for extended wear life against corrosion
- Renovate old worn steps
- Installs in seconds
- Save thousands in inventory costs
- Save thousands in installation costs
- One size fits all
- No additional hardware required

## Easy Installation

## Features

- Fantastic step definition
- Double action anti-slip grate cleats
- Self-locking non return barbs
- Flared leading edge to enable fast installation

# GRIPMASTER INDUSTRIAL NOSINGS

- Industrial grade nosings are the perfect answer for slippery stairs where grating patterns do not allow U-TREDS to be used
- Can be made into any size and fitted onto steps & platforms in any environment
- Available in galvabond, aluminium and stainless steel base foundations

# ► C-STUD

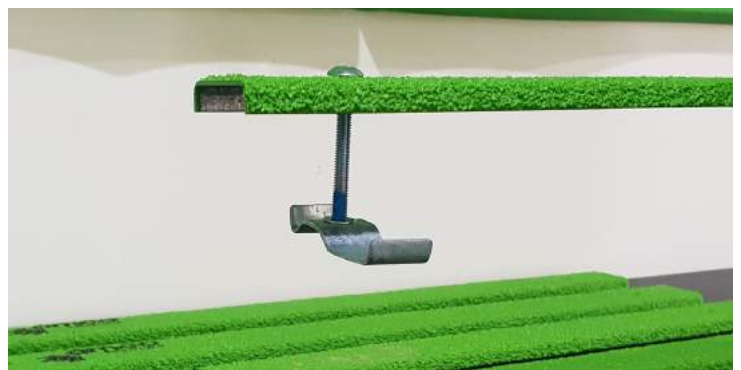

- For slippery inclined walkways, ramps and slopes
- Composed of tough hard wearing aggregate, providing maximum grip
- Available in any length to suit any type of incline and walkway
- AMCO quick clips available for fast installation
- Complies with Australian Walkway Standards

# LADDER RUNG CAPS & HANDRAIL COVERS

- For slippery ladder rungs, handrails and access points
- Match your desired profile with a solution to keep your ladders slip free and safer for your team

- We can press and bend the ladder caps to suit all types of ladder rungs to give a secure footing in the presence of oil & other liquids
- Coarse and Fine Aggregate for gloved and bare handed climbs

# ► GRIPMASTER PLATE

- Gripmaster plate is the best option for a surface which needs to be kept slip-free but cannot have holes for drainage or debris to gather in
- 10-year premium grade plates, manufactured in all shapes and sizes from a variety of metals
- Offshore variant for wet conditions such as coastal areas and oil rigs

# LIONPLATE PERF SHEET

## FEATURES

- Aggressive Industrial Grip for tough working conditions
- Cut and bent to size to match structural design drawings
- 2mm plate for extra support and strength
- Will not delaminate or chip away under aggressive use

## BENEFITS

- Galvanised or stainless steel for long life protection
- Extremely competitive service
- Quick and easy to install
- Tek screw or weld onto existing platforms or structure

# ► FRP GRATING & NOSINGS

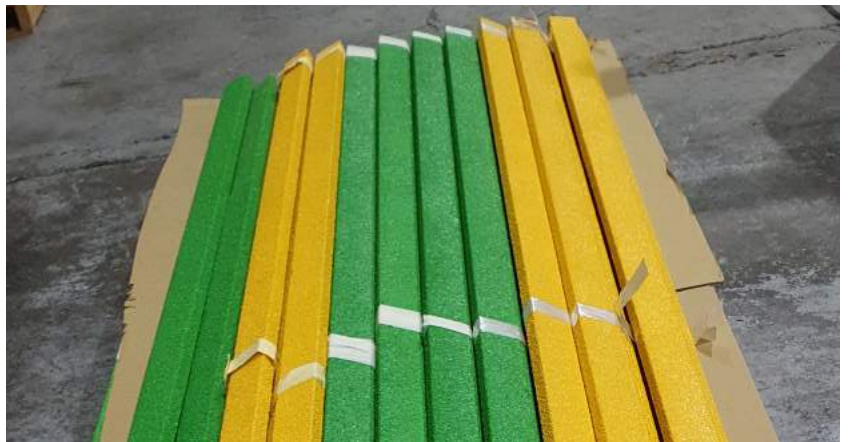

## FEATURES

- Fiberglass reinforced plastic
- One piece construction increases load bearing capabilities
- Non Conductive which make this product ideal for Electrical Environments
- Excellent resistance to ignition under exposure to extreme heat and impact

## BENEFITS

- Simple to install for walkways & overhead platforms
- Light, Easy to manage and exceeds the strength of steel
- Pre cut to your dimensions

# POPULAR ITEMS

Boasting an impressive 18kg load rate, the contrast stitching of the Tether Choke makes lanyard inspections quick and easy.

Two fully adjustable wristbands and non-conductive tethers, perfect for working on electrical componentry.

The Tape Measure Tether and Lightweight Coil Tool Lanyard make the perfect combo for protecting your Lufkin from snapping upon impact and breaking someone's head open.

The Aero Pouch can be filled with nuts, connectors, fittings etc. and when tipped upside down they will not fall out.

The Extended Bungee Lanyard can be used to get that extra reach when using a spanner around a corner or in a hard-to-reach spot. It has the length of a coil lanyard, but without the snag points.

Tether loop can increase any tool eyelet or hole size to allow for fast hitching and unhitching from tethers.

The 8 ring adaptors for screw-drivers are a semi-permanent tether point, they don't get in the way and don't come off unless you manually remove them.

Tether tape is waterproof, oil proof, greaseproof and drop-proof. Use Tether tape to fix D Ring Tether points to any tool, like this hammer handle as shown.
